Web Developer - House of Ireland

House of Ireland is one of Ireland’s leading retailers of Irish and international high-end lifestyle gift-ware, crystal and china, clothing, jewellery and accessories, linen and crafts. With a flagship store opposite Trinity College in the centre of Dublin, two travel retail stores in Dublin Airport and one in Belfast City Airport, House of Ireland showcases over 200 internationally recognised brands such as Waterford Crystal, John Rocha, Belleek, Newbridge, Tipperary Crystal, Louise Kennedy, Orla Kiely, Barbour, Swarovski, and Lladro. House of Ireland is also a leading specialist in premium corporate gift-ware. Having established a mail order channel to complement our retail business in 1975, House of Ireland pioneered the Internet in Ireland when our e-commerce website was first developed in 1995.

Web Developer
Our business has expanded in the past four years and House of Ireland is now redeveloping its e-commerce operations. Our e-commerce strategy includes migration to a new e-commerce and content management system. This is an exciting opportunity to create a leading website for an international customer base that spans Europe, US, Asia, and beyond. We are seeking a highly intelligent and capable web developer with strong programming skills and experience implementing eCommerce systems, ideally, Magento. Must have good interpersonal skills.

Tasks

- Install new web infrastructure on hosted LAMP platform
- Migrate current website to new CMS - Magento
- Implement responsive theme and make modifications
- Ensure full functionality incl. payment methods, currency, price updates, shipping
- Migrate data and images. Develop data/image manipulation tools for easy import/export.
- Provide support for email marketing (data capture, transmission and template design)

Educational and Skill requirements:

- Computer Science, Engineering or Maths degree
- Exceptionally strong programming skills
- Linux system administration
- Experience of implementing eCommerce CMS
- Knowledge of Java, Python, PHP, C, C++
- Knowledge of XHTML, CSS, JavaScript, Ajax, jQuery, JAVA, and open source CMS's.

How to Apply:

- Please email your CV directly to personnel@houseofireland.com
  - Please note: CVs submitted by email should be in word, rtf, or pdf format only
  - You must be eligible to work in Ireland
  - Ensure your email and telephone number (including mobile) are included with your application
DCU graduates/alumni should put in the subject line: Ref: DCU CV - HOI Web Developer (this will ensure priority for review by House of Ireland)

**In your cover email, please provide the following details:**

1. Highlight Educational qualifications
2. Outline level and range of programming proficiency and linux sys admin experience
3. Where are you currently based and when are you available to start? Explain any VISA issues/restrictions
