The BSc in Health and Society gave me the tools I needed to not only understand how the human body works but to recognize that we all view health in different ways.

The programme combines a range of both broad and specific health modules, which provided a solid foundation to allow me to progress to an MSc in Public Health. Three years well spent!

Karl F. Conyard
BSc in Health and Society
What’s Unique?

— A strong emphasis is placed on research inquiry into and action on key contemporary health issues

— Option to focus on health issues of personal relevance and interest to you

— Opportunity for engagement in health action projects and campaigns locally, nationally and globally

— Work with a dynamic lecturing team that has diverse health-related expertise and experiences

How You Fit the Course
This degree will help you understand health in biological, social, political, ethical and psychological contexts. You’ll learn about health research and the implications of evolving technology, engage in health action projects or campaigns, research experiences in illness and disability, and examine health-related issues like drugs in society, nutrition, body image, trauma and abuse.

Careers
As a DCU Health and Society graduate, you’ll be well placed for a future career in a health-related profession or for work in overseas development, community development and the voluntary sector.

The degree also provides a good entry route to postgraduate study if you hope to pursue a career in an area like speech therapy, occupational therapy, or medicine and health promotion.
