

Is the study confidential?

Yes, your information will be kept safe and confidential. If other researchers ever want to use your personal information, they will have to ask you directly for your permission.

What do you need to do if you want to take part?

If you would like to take part in this study, please:

Email us at tbi@dcu.ie, or

Phone us on: +353 (01) 700 6190

Who We Are

Project Partners

This is a collaborative project involving DCU, Acquired Brain Injury Ireland, Headway, National Rehabilitation Hospital, Beaumont Hospital, Cork University Hospital, and Letterkenny University Hospital.

Traumatic Brain Injury: Roads to Recovery

Volunteers needed for our research study

Traumatic brain injury (TBI) – also known as head injury – is a leading cause of death and disability worldwide. This is the first study of its kind, focusing on pathways through rehabilitation in Ireland.

Would you like to be part of this research?

We value your input and we would love to hear from you, if:

- You have experienced a moderate to severe TBI
 - You are aged 18 years or over
 - You live in Ireland
- Or:
- You are a family member/carer of an individual with a TBI

What will we ask you to do in this study?

If you have had a TBI, we will ask you to:

- Answer questions about your TBI (this will likely take an hour)
- We will ask your permission to look at your medical records for information relevant to your brain injury (circumstance, severity, etc.)

If you are a family member/carer of an individual with a TBI, we will ask you to:

- Answer questions about you and your experience as a family member/carer of an individual with a TBI

“Research is creating new knowledge”

What are the benefits to taking part in this study?

In Ireland, we know there are limited services for people affected by brain injury. This study will help document this and can help plan for these services. The information you give us can go on to help someone else who has a similar type of injury.
