People with Intellectual Disability, Staff and Families working together to improve Services (Service Improvement Module)

Project based in the School of Nursing and Human Sciences.

Overall vision is to build leadership capacity within all members of a three person team.

Focus is on improvements and change within services for people with intellectual disability

Students get the opportunity to work as a team within a College and Service environment

Service providers give support with staff on a steering group, mentors for the teams and other practical resources

Examples of Team Projects

Sensory Garden

Biccie Bakes

Testimonials

I found the module interesting and didn’t realise everything that was happening in the service (family member)

I felt the lecturers were very informative and approachable (staff member)

Walking around College and going into the Helix for coffee makes me feel part of it (service user)
