

**Insight Centre for Data Analytics  
UX Developer  
8 month contract**

**Background**

The Insight Centre for Data Analytics (<http://www.insight-centre.org>) is world class research center. A joint initiative between Dublin City University, NUI Galway, University College Cork, and, University College Dublin, as well as other partner institutions, it brings together a critical mass of more than 450 researchers from Ireland's leading ICT centers to develop a new generation of data analytics technologies in a number of key application areas.

The €88m Centre is funded by Science Foundation Ireland and a wide range of industry partners. Insight's research focus encompasses a broad range of data analytics technologies from machine learning, decision analytics and social network analysis to linked data, recommender systems and the sensor web. Together, with more than 70 partner companies, Insight researchers are solving critical challenges in the areas of Connected Health and the Discovery Economy.

**The Opportunity**

Researchers at Insight have been developing new ways of collecting personal analytics data on mobile devices which has opened up commercialization opportunities in a number of sectors particularly within health. We are seeking people with a start-up mindset to join our early-stage team developing a new software-as-a-service which can revolutionize how innovation takes places in health and associated fields. With output focused on our early-adopter clients there is a significant opportunity for people with the right interests, enthusiasm and engineering skills to become part of a new high growth company as the project develops.

**Background & Role**

We are seeking a UX developer to help design an end-user development interface as a web application for the rapid deployment of mobile applications. The design process will extend to mobile clients and therefore an integrated design approach is necessary. More specific details can be discussed at the interview stage.

**Responsibilities**

Reporting to the project lead Professor Tomas Ward the engineer will:

- Engage with a team comprising a full stack developer and mobile developer on a daily basis to drive the design, development and closed beta deployment of a new software-as-a-service for personal analytics.
- Demonstrate a commitment to quality over expediency in solution development
- Engage regularly and effectively with customers working in regulated industry sectors
- Identify and populate in dialogue with Prof Ward revised roadmaps for the proposed service

## Skills

Below are some pointers to examples of technologies that are used in our projects, to indicate the type of experience we require. The successful candidate should demonstrate strong competence in some of these technologies:

- Excellent written and verbal communication and interpersonal skills.
- Javascript (Backbone / Angular / Ember / React / jQuery)
- HTML5 & CSS3
- UX / UI Design Experience
- Co-design/co-creation knowledge

## Minimum Criteria

The ideal candidate will have a degree in an appropriate area or equivalent (NFQ Level 7) plus 2 years' appropriate experience. Typically an honours BSc in Computer Science, Software Engineering or a related discipline with practical UX experience.

## Additional Information

*Salary Scale: €43,633 per annum*

**Closing Date: 5<sup>th</sup> April 2019**
