

Research Centre	School of Chemical Sciences / National Centre for Sensor Research (NCSR)
Post title	Postdoctoral Researcher in Physical Electrochemistry and Sensors.
Level on Framework	Level 1
Post duration	Fixed Term Contract – Up to 16 months

Research Career Framework

As part of this role the researcher will be required to participate in the DCU Research Career Framework <http://dcu.ie/hr/ResearchersFramework/index.shtml>. This framework is designed to provide significant professional development opportunities to researchers and offer the best opportunities in terms of a wider career path.

DCU has a strong track record in attracting both Irish and European Union research funding under Horizon 2020 (and all previous Framework Programmes), Marie Curie Actions and Erasmus. We offer a dynamic and internationally-focused environment in which you can advance your academic career.

Overview

The National Centre for Sensor Research (NCSR) is a large, multidisciplinary research unit based in state-of-the-art facilities situated on the campus of Dublin City University. Arising from success in recent proposals we are now seeking application for the following research position in DCU.

Background and Role

We are seeking a postdoctoral scientist with a PhD in electrochemistry, electrochemical sensors, electrochemical reactors or a closely related field. The researcher will contribute to projects focussed on developing electrochemical sensors for pathogens and other molecules in waste water as well as developing a flow through electrochemical reactor for destruction of recalcitrant organics.

Experience in electrochemistry and practical applications is essential. Experience in sensor development, (electro)materials, electrochemical reactor design or boron doped diamond electrodes are particularly sought. Candidates with experience of working with wireless or bipolar electrochemistry is an advantage.

The duration of this role will be 12 months, with potential to be extended for an additional 12 months subject to project requirements and funding availability.

Principal Duties and Responsibilities

Reporting to his/her Principal Investigator the Postdoctoral Researcher will:

- Conduct, with a very high degree of technical competence a specified programme of research and scholarship under the supervision and direction of the Principal Investigator.
- Disseminate the outcomes of the research in which he/she is engaged including publishing in high quality peer reviewed journals of international standing.
- Support the PI and research group in the design and development and implementation of the broader research programme.
- Support the development of proposals for research funding.
- Take responsibility as requested for day-to-day advice and support of graduate research students and undergraduates doing project work associated with the research group.
- Mentor, assist and train as appropriate and as directed, the research graduate students and more junior postdoctoral fellows within the group.
- Contribute to reporting, site visit preparation and other administrative management work associated with the programme of research and the research group.
- Contribute to teaching and outreach activities of the group.
- Engage strongly with collaborators working on the broader project including travel as needed.
- Liaise with stakeholders such as industry and collaborators.
- Engage in appropriate training and development opportunities as required by the Principal Investigator, the School or Research Centre, or the University.
- Carry out administrative work associated with the programme of research as necessary.

Minimum Criteria

The candidate should have a PhD in chemistry, physical chemistry or related discipline with significant experience in electrochemistry, materials, sensor development or electrochemical reactors.

The candidate should be capable of working independently with a high degree of technical competence whilst also being a team player, he/she must demonstrate initiative, be hard working, versatile and productive. S/he should have good communication and organisational skills.

Salary: *€37,223 - €40,661

**Appointment will be commensurate with qualifications and experience.*

Closing date: April 26, 2019

Candidates will be assessed on the following competencies:

Discipline knowledge and Research skills – Demonstrates a track record of delivering projects with significant outcomes, has knowledge of a relevant research discipline and the ability to conduct a specific programme of research within that discipline.

Understanding the Research Environment – Demonstrates an awareness of the research environment (for example funding bodies) and the ability to contribute to grant applications.

Communicating Research – Demonstrates the ability to communicate their research with their peers and the wider research community (for example presenting at conferences and publishing research in relevant journals) and the potential to teach and tutor students

Managing & Leadership skills - Demonstrates the potential to manage a research project including the supervision of undergraduate students.

Informal enquiries to:

Professor Robert J. Forster, School of Chemical Sciences, DCU, Dublin 9, Ireland

E-mail: Robert.Forster@dcu.ie (preferred communication pathway) Phone: +353 (0)1 7005943

Please do not send applications to this email address, instead apply as described below.

Application Procedure

To apply for this role, applications should include a CV and covering letter and be submitted with the application form to the Human Resources Department as outlined below.

Application forms are available from the DCU Current Vacancies (open Competitions) website at <https://www.dcu.ie/hr/vacancies/index.shtml> and also from the Human Resources Department, Dublin City University, Dublin 9. Tel: +353 (0) 1 7005149.

Please clearly state the role that you are applying for in your application and email subject line: Job Ref 1182 Postdoctoral Researcher in Physical Electrochemistry and Sensors, NCSR

Applications should be submitted by email to hr.applications@dcu.ie or by Fax: +353 (0)1 7005500 or by post to the Human Resources Department, Dublin City University, Dublin 9. Human Resources Department, Dublin City University, Dublin 9. Tel: +353 1 700 5149; Fax: +353 1 700 5500 Email: hr.applications@dcu.ie
