

International Centre for Neurotherapeutics (ICNT)

Postdoctoral Researcher Level 1 (Biotherapeutics for Chronic Pain)

Research Career Framework

As part of this role the researcher will be required to participate in the DCU Research Career Framework. This framework is designed to provide significant professional development opportunities to Researchers and offer the best opportunities in terms of a wider career path.

Background & Role

ICNT is a multi-disciplinary and well-funded research Centre. Particular emphasis is being placed on developing novel treatments for certain neuronal disorders, based on deciphering the molecular mechanisms of quantal release of transmitters and pain mediators. The Centre is well equipped especially with high-end facilities for *in vitro* and *in vivo* imaging (multiphoton fluorescence and confocal scanning microscopy), mass spectrometry, molecular cellular biology, manual plus automated patch clamp recording, and a PRTL I founded pain laboratory.

We are now seeking a highly engaged and productive scientist to join our multi-disciplinary team developing neurotherapeutics for treating chronic pain.

Duties & Responsibilities

Reporting to his/her Principal Investigator the Postdoctoral Researcher will:

- Conduct a specified programme of research under the supervision and direction of the Principal Investigator which will measure the efficacy and duration of the generated biotherapeutics in rat models of inflammatory and neuropathic pain
- Assist in identifying and developing future research and funding initiatives
- Engage in the dissemination of the results of the research in which he/she is engaged with the support of and under the supervision of the Principal Investigator
- Supervise and assist undergraduate students working in this area with their research
- Engage in appropriate training and development opportunities as required by the Principal Investigator, the School or Research Centre, or the University.
- Engage in teaching and teaching support as assigned by the Head of School under the direction of the Principal Investigator
- Liaise with both internal and external stakeholders including industry and academic partners/collaborators
- Carry out administrative work associated with the programme of research as necessary

Experience & Qualifications

Applicants should have a PhD in Biological Sciences at least 1 first author publication, considerable research experience in rat models of inflammatory and neuropathic pain, good communication and a deep commitment to research in biotherapeutics.

Candidates will be assessed on the following competencies:

Discipline knowledge and Research skills – Demonstrates knowledge of a research discipline and the ability to conduct a specific programme of research within that discipline.

Understanding the Research Environment – Demonstrates an awareness of the research environment (for example funding bodies) and the ability to contribute to grant applications

Communicating Research – Demonstrates the ability to communicate their research with their peers and the wider research community (for example presenting at conferences and publishing research in relevant journals) and the potential to teach and tutor students

Managing & Leadership skills - Demonstrates the potential to manage a research project including the supervision of undergraduate students.

Informal initial enquiries: Dr. Jiafu Wang, ICNT E-mail: jiafu.wang@dcu.ie
phone: (01) 7007769

Duration: One year in the first instance; subject to available funding and satisfactory performance there may be an opportunity to offer a further contract of up to three years in duration.

Salary range: €33,975 - €36,003 *subject to experience and qualifications*

Closing date: 31st July 2014

Application Procedure:

Application forms are available from the DCU Current Vacancies (Open Competitions) website at <http://www4.dcu.ie/hr/vacancies/current.shtml> and also from the Human Resources Department, Dublin City University, Dublin 9. Tel: +353 (0)1 700 5149; Fax: +353 (0)1 700 5500 Email: hr.applications@dcu.ie

Applications should be submitted by e-mail to hr.applications@dcu.ie or by Fax: +353 (0)1 700 5500 or by post to the Human Resources Department, Dublin City University, Dublin 9.

Dublin City University is an equal opportunities employer
