**Background:**
This is an opportunity to join a Marie Skłodowska Curie Initial Training Network (eCHO Systems) as an ESR focused on the improvement of recombinant protein production (Biopharmaceuticals) in Chinese Hamster ovary (CHO) cells. This is a large EU Horizon 2020-funded program that will employ 15 ESRs in total to complete their PhD training on various aspects on CHO cell molecular and systems-level biology. The network consists of 4 Academic institutions from across Europe and more than a dozen industry partners. A more detailed overview of the ITN can be found at [http://www.echo-systems.eu/](http://www.echo-systems.eu/).

This ESR will be registered on the PhD program at Dublin City University within the National Institute for Cellular Biotechnology (NICB, [http://www.nicb.dcu.ie/research_cho_home.html](http://www.nicb.dcu.ie/research_cho_home.html)), under the supervision of Dr. Paula Meleady. The ESR will also spend a short secondment at Eli-Lilly in Cork, Ireland.

**Project Title:** Proteomics and post-translational regulatory networks

**Objectives:**
- Identification of protein expression patterns across a range of CHO cell types and culture conditions including the use of cellular fractionation for focused proteome mining.
- Identification of differential protein phosphorylation in different cell lines and conditions.
- Integration and correlation of the expression of these with cellular performance and behaviour as well as with other omics datasets towards constructing a multi-omics, systems level model of the CHO platform.

**Expected Results:**
- Identification of proteins and protein modifications that contribute to various CHO cell phenotypes including growth, productivity, secretion and glycosylation.
- Greater understanding of how gene dosage (genome copies), expression (transcriptomics), regulation (post-transcriptionally and post-translationally) combine to dictate the levels of functional protein (proteomics) within various cell types under different conditions.
Minimum Criteria
Applicants must have a minimum of a 2.1 Honours Degree in cell biology, molecular biology, biochemistry, biotechnology or a related science. Experience in proteomic techniques and eukaryotic cell biology are desirable. Good communication skills in English, both written and spoken are essential.

Salary: Marie Curie ESR Salary will be in the range of €37,903 - €42491 p.a., before taxes, as determined by EU guidelines.

Conditions
As a Marie Curie Early Stage Researcher, you shall at the time of recruitment be in the first four years (full-time equivalent research experience) of your research career and have not yet been awarded a doctoral degree. At the time of recruitment, you shall not have resided or carried out your main activity (work, studies etc.) in the country of the host institution (Ireland) for more than 12 months in the 3 years immediately prior to the reference date. Compulsory national service and/or short stays such as holidays are not taken into account.

Closing date: 1st April 2015

Informal enquiries to:
Dr. Paula Meleady, NICB, DCU
E-mail: paula.meleady@dcu.ie

Please do not send applications to this e-mail address, instead apply as described below.

Application Procedure:
Applications should include a CV (with 3 references) and covering letter, explaining why you are interested in pursuing a PhD in this area, and be submitted with the application form as outlined below.

Please quote the title: Marie-Curie Early Stage Researcher (ESR) Proteomics and post-translational regulatory networks in the email subject line & in your application.

Application forms are available from:
Application forms are available from the DCU Current Vacancies (open Competitions) website at http://www.dcu.ie/vacancies/current.shtml and also from the Human Resources Department, Dublin City University, Dublin 9. Tel:+353 (0) 1 7005149.

Applications should be submitted by email to hr.applications@dcu.ie or by Fax: +353 (0)1 7005500 or by post to the Human Resources Department, Dublin City University, Dublin 9.

Dublin City University is an equal opportunities employer
