

**Traumatic Brain Injury project**  
**School of Nursing and Human Sciences**  
**Post-doctoral Researcher**  
**Fixed Term Contract up to Two Years**

**Background:**

Dublin City University ([www.dcu.ie](http://www.dcu.ie)) is a research-intensive, globally-engaged, dynamic institution that is distinguished by both the quality and impact of its graduates, and its focus on the translation of knowledge into societal and economic benefit. DCU prepares its students well for success in life, and in the workplace, by providing a high-quality rounded education appropriate to the challenges and opportunities of the 21st century. Excellence in its education and research activities has led to DCU's consistent presence in the rankings of the world's top young universities.

DCU has a strong track record in attracting both Irish and European Union funding under FP7, Horizon 2020, Marie Curie Actions and Erasmus. We offer a dynamic and internationally focused environment in which to advance your academic career.

**Overview:**

The School of Nursing and Human Sciences at DCU is a leader in its field with expertise in the provision of psychology, nursing, psychotherapy, sexuality studies, health & society and other health and social care multidisciplinary educational and research programmes.

The TBI project is a two year piece of work, funded by the HRB and being done in partnership with the major head injury charities in Ireland, Headway and ABI Ireland. The goal is to recruit a cohort of patients at various stages following moderate or severe head injury, and to follow them up over a year, looking at short and medium term impacts, and access to and use of health and social care services.

**The Role:**

The successful candidate will lead the day-to-day implementation of the TBI research, and will supervise the work of a research assistant. They will also engage in aspects of research such as recruitment, literature review, qualitative and quantitative data collection and analysis, writing and editing, and more generally assist in the preparation of academic manuscripts/publications and dissemination to lay audiences.

***Principal duties and responsibilities:***

Reporting to the Principal Investigator, the post-doctoral researcher will:

- Lead, and conduct with, a high degree of competence a specified programme of research under the supervision and direction of the Principal investigator.
- Manage the project team day-to-day, delegating tasks to the team, and ensuring that they are completed in a timely manner, and to a high standard.
- Carry out the tasks required to achieve this.

These will include:

- Preparation of the ethical approval documentation;
- Recruiting participants and their carers;
- Carrying out interviews and follow-up contacts, in person, over the telephone, or by electronic means.
- Preparing literature reviews to support the project deliverables;
- Delivery of project outputs and reports as required by the project schedule;
- Administrative work associated with the programme of research as necessary.
- Liaison with knowledge users and clinical partners the TBI network, and with stakeholders such health and social care professionals, participants and collaborators.
- Engaging in dissemination of results at network and project events, and national and international conferences, and prepare research outputs for submission to high impact international journals and to a lay audience.
- Supporting as required, the development of proposals for further research funding.
- Engaging in appropriate training and development opportunities as required by the Principal Investigator, the School or the University.

Variation of these duties and any other relevant duties as assigned by the Principal Investigator.

### **Experience and Qualifications:**

Applicants should have a doctoral degree in a relevant discipline, and strong written and verbal communication and interpersonal skills. Previous, demonstrable and substantial experience of health or social care research is essential. Experience in working with people affected by brain injuries would be an advantage.

Applicants should also have:

- Evidence of producing research outputs
- Excellent written and oral proficiency in English.
- Evidence of excellent empirical research skills.
- Skills and significant experience in the design, management and conduct of research.
- Demonstrable ability to work independently and as a team member within a multidisciplinary team.
- Quantitative and qualitative data collection and analysis skills.
- Academic article writing skills.
- Presentation skills.

In addition, it is desirable that applicants have:

- Knowledge of some of the relevant academic literature in the general area of brain injuries and health research.

**Salary Scale: \* €37,223 to €37,757pa - IUA post-doctoral scale Point 1 -2**

\* Appointment will be commensurate with qualifications and experience, and will be made on the appropriate point of the IUA Post-doctoral Researcher salary scale in line with current Government pay policy.

**Closing date:** 8<sup>th</sup> November 2018
