

Research Centre: DCU Water Institute

Post title: Post-doctoral research in water technology relating to separations for Wastewater treatment, biofilm control and monitoring

Level on Framework: Level 1

Post duration: Fixed Term contract up to 12 months

Research Career Framework

As part of this role the researcher will be required to participate in the DCU Research Career Framework <http://dcu.ie/hr/ResearchersFramework/index.shtml>. This framework is designed to provide significant professional development opportunities to researchers and offer the best opportunities in terms of a wider career path.

Overview

DCU Water Institute is a large, multidisciplinary research unit based in state-of-the-art facilities situated on the campus of Dublin City University. Arising from success in recent proposals we are now seeking applications for the following research position in DCU.

Background and Role

Applications are invited for a highly motivated and talented Post-Doctoral Researcher to conduct laboratory and industry based research on water related research. The post involves work on a number of projects relating to analytical science (GC-MS analysis), membrane separation, biofilm assessment, chemical characterisation of wastewater.

Applicants should be qualified in chemistry or related disciplines, and have obtained a PhD in an appropriate discipline with research/industrial experience in analytical science with material science and characterisation expertise.

The successful candidate will join a multidisciplinary team of post-doctoral engineers and scientists in the Water Institute.

Principal Duties and Responsibilities

Reporting to his/her Principal Investigator the Postdoctoral Researcher will:

- Conduct, with a very high degree of technical competence a specified programme of research and scholarship under the supervision and direction of the Principal Investigator.

- Disseminate the outcomes of the research in which he/she is engaged including publishing in high quality peer reviewed journals of international standing.
- Support the PI and research group in the design and development and implementation of the broader research programme.
- Support if required, the development of proposals for research funding.
- Take responsibility as requested for day-to-day advice and support of graduate research students associated with your research group.
- Mentor, assist and train as appropriate and as directed, the research graduate students and more junior postdoctoral fellows within the group.
- Contribute to reporting, site visit preparation and other administrative management work associated with your programme of research and the research group.
- Contribute to teaching and outreach activities of the group.
- Liaise with stakeholders such as industry and collaborators.
- Engage in appropriate training and development opportunities as required by the Principal Investigator, the School or Research Centre, or the University.
- Carry out administrative work associated with the programme of research as necessary.

Minimum Criteria

The candidate should possess the following criteria:

The candidate should hold a primary degree in chemistry, analytical chemistry, materials chemistry etc. with a PhD in materials, engineering or analytical science for biofilms and membranes. The candidate should be experienced in analytical techniques. The candidate should be capable of working independently with a high degree of technical competence and whilst also being a team player, he/she must demonstrate initiative, be hard working, versatile and productive. S/he should have excellent communication and organisational skills.

Salary: €38,860 per annum

Closing date: 27 January 2017

Candidates will be assessed on the following competencies:

Discipline knowledge and research skills – Demonstrates knowledge of a research discipline and the ability to conduct a specific programme of research within that discipline.

Understanding the research environment – Demonstrates an awareness of the research environment (for example funding bodies) and the ability to contribute to grant applications.

Communicating research – Demonstrates the ability to communicate their research with their peers and the wider research community (for example presenting at conferences and publishing research in relevant journals) and the potential to teach and tutor students.

Managing & Leadership skills - Demonstrates the potential to manage a research project including the supervision of undergraduate students.

Informal enquiries to:

Prof. Fiona Regan, Director, DCU Water Institute, DCU, Dublin 9.
