

Research Centre:	Insight Centre for Data Analytics
Post Title:	Postdoctoral Researcher (Two positions)
Level:	Level 1
Post Duration:	Fixed Term Contract up to 2 Years

Research Career Framework

As part of this role the researcher will be required to participate in the DCU Research Career Framework <http://www.dcu.ie/hr/ResearchersFramework/index.shtml>. This framework is designed to provide significant professional development opportunities to Researchers and offer the best opportunities in terms of a wider career path.

DCU has a strong track record in attracting both Irish and European Union research funding under Horizon 2020 (and all previous Framework Programmes), Marie Curie Actions and Erasmus. We offer a dynamic and internationally-focused environment in which to advance your academic career.

Background

The Insight Centre for Data Analytics (<http://www.insight-centre.org>) is a joint initiative between researchers at Dublin City University, NUI Galway, University College Cork, and, University College Dublin, as well as other partner institutions. It brings together a critical mass of more than 400 researchers from Ireland's leading ICT centers to develop a new generation of data analytics technologies in a number of key application areas.

The €88m Centre is funded by Science Foundation Ireland and a wide range of industry partners. Insight's research focus encompasses a broad range of data analytics technologies from machine learning, decision analytics and social network analysis to linked data, recommender systems and the sensor web. Together, with more than 70 partner companies, Insight researchers are solving critical challenges in the areas of Connected Health and the Discovery Economy. Current project funding is to July 2019.

The Project

The specific project for which these roles are being recruited, involve the development of recommender systems for video, using video analytics and deep learning approaches.

Background & Role

Insight wishes to recruit two Postdoctoral Researchers on a fixed term contract basis to facilitate the delivery of an industry-sponsored research project. Working at the boundary of research and

industry, the project is a collaborative programme of research between industry and Insight researchers.

Principle Duties and Responsibilities

Reporting to his/her Principal Investigator(s) the Postdoctoral Researchers will:

- Support the research group in software and system development for an Insight Project in the area of video recommendation using deep learning approaches.
- Contribute to the design and implementation of the project's prototype demonstrators.
- Provide support and advice to PhD students working on similar topics.
- Produce top quality journal and conference publications, in collaboration with the Principal Investigators (PIs).
- Participate in Insight Centre activities, including industry showcases, annual reviews and industry and agency visits to the Insight labs.
- Assist with presentation and documentation of demonstrator systems for our industry sponsor.
- Other tasks relevant to successfully implementing the project's and the Research Centre's research programme.
- Carry out administrative work associated with the programme of research as necessary

Below are some pointers for the type of experience we require:

- Excellent knowledge of one or more of: Java, C++, PHP, node.js, Objective-C, C.
- Excellent knowledge of scripting languages: Python, Bash, Perl, JavaScript, d3.js.
- Experience working with UNIX, Linux, VMWare, OSX or Windows operating systems.
- Database management skills: MySQL, MongoDB, CouchDB, Neo4j, SQL.
- Experience of developing machine learning, especially deep learning based applications.
- Experience of modern techniques and implementations in computer vision, or collaborative filtering.

Skills

- Excellent written and oral proficiency in English (essential)
- Excellent written and verbal communication and interpersonal skills.
- Proven ability to prioritise workload and work to strict deadlines.
- Ability to work in a team and to take responsibility to contribute to the overall success of the team.
- Strong problem solving abilities.

Minimum Criteria

Ideally applicants will have a PhD in Computer Science, Engineering or a related discipline with strong software and programming skills and relevant experience in computer vision, deep learning, or collaborative filtering.

Salary Scale: * €35,488 – €46,255

*Appointment will be commensurate with qualifications and experience and will be made on the appropriate point of the salary scale, in line with current government pay policy

Closing date: 15th May 2017

Candidates will be assessed on the following competencies:

Discipline knowledge and Research skills – Demonstrates knowledge of a research discipline and the ability to conduct a specific programme of research within that discipline.

Understanding the Research Environment – Demonstrates an awareness of the research environment (for example funding bodies) and the ability to contribute to grant applications

Communicating Research – Demonstrates the ability to communicate their research with their peers and the wider research community (for example presenting at conferences and publishing research in relevant journals) and the potential to teach and tutor students

Managing & Leadership skills - Demonstrates the potential to manage a research project including the supervision of undergraduate students.

Informal enquiries to:
