Applications are invited from suitably qualified staff for the following position:

**Research Software Developer**  
*Insight SFI Research Centre for Data Analytics*  
*Fixed Term Contract up to 12 Months*

**DCU**

Dublin City University (www.dcu.ie) is a research intensive, globally engaged, dynamic institution which has developed its own research specialists, established internationally recognized centres of excellence that have substantive collaborative links with leading universities and industrial partners. DCU is distinguished both by the quality and impact of its graduates and by its focus on the translation of knowledge into societal and economic benefit. Through its mission to transform lives and societies through education, research and innovation DCU acts as an agent of social, cultural and economic progress. DCU is Ireland’s fastest growing university and now hosts more than 17,000 students across its three academic campuses: DCU Glasnevin Campus, DCU St Patrick’s Campus and CU All hallows campus. DCU has a strong track record in attracting both Irish and European Union research funding under Horizon 2020 (and all previous Framework Programmes), Marie Curie Actions and Erasmus. We offer a dynamic and internationally-focused environment in which to advance your academic career.

**The Insight SFI Research Centre for Data Analytics**

The Insight SFI Research Centre for Data Analytics (http://www.Insight-centre.org) is a joint initiative between researchers at University College Dublin, NUI Galway, University College Cork, and Dublin City University, as well as other partner institutions. It brings together a critical mass of more than 400 researchers from Ireland’s leading ICT centres to develop a new generation of data analytics technologies in a number of key application areas.

The €150m Centre is funded by Science Foundation Ireland and a wide range of industry partners. Insight’s research focus encompasses a broad range of data analytics technologies from machine learning, decision analytics and social network analysis to linked data, recommender systems and the sensor web. Together, with more than 220 partner companies, Insight researchers are solving critical challenges in the areas of Connected Health and the Discovery Economy.

**Role Profile**

The Insight Centre is now recruiting for a Research Software Developer to join the FinAccAI team working on industry research & development projects funded by Enterprise Ireland through Commercialisation Fund Awards.
**Duties and Responsibilities:**
Please refer to the job description for a full list of duties and responsibilities associated with this role.

**Experience and Qualifications**
Candidates must have a degree in an appropriate area or equivalent (NFQ Level 7), (typically an in Computer Science, Software Engineering or a related discipline), plus 6 years’ appropriate experience.

In addition, it is beneficial if the candidate has experience in the following areas:
- Large scale object-oriented project implementations
- Understanding of statistical analysis and/or AI principles as applied in software development, e.g. clustering analysis and spectral clustering
- Backend development, server-side development including database layer (e.g. Python, Django/Flask, Node.js)
- Cloud skills / deployments including dev-ops (e.g. Nginx, Puppet, Ansible)
- Knowledge of architectural patterns for OO monolithic and distributed software architectures
- Microservice and/or Function as a Service implementation
- Excellent written and verbal communication.

**Salary Scale:** Analyst Programmer III, €57,431 - €70,190

Appointment will be commensurate with qualifications and experience will be made on the appropriate point of the salary scale, in line with current Government pay policy

**Closing date: 16th of March 2020**

**Informal Enquiries in relation to this role should be directed to:**
Informal enquiries may be addressed to Dr. Andrew McCarren, School of Computing, Insight Centre for Data Analytics, Dublin City University.
