School of Law and Government
Marie Curie: Early Stage Researcher
Intersex: New Interdisciplinary Approaches (INIA) Training Network
Fixed-term Three Year contract

Introduction

Dublin City University (www.dcu.ie) is a research-intensive, globally-engaged, dynamic institution that is distinguished by both the quality and impact of its graduates and its focus on the translation of knowledge into societal and economic benefit. DCU prepares its students well for success in life, and in the workplace, by providing a high-quality, rounded education appropriate to the challenges and opportunities of the 21st century. As Ireland’s University of Enterprise and Transformation, DCU is characterised by a focus on innovation and entrepreneurship and a track-record of effective engagement with the enterprise sector, including commercial, social and cultural enterprises. Excellence in its education and research activities has led to DCU’s consistent position in the rankings of the world’s top young universities.

DCU has a strong track record in attracting both Irish and European Union funding under FP7, Horizon 2020, Marie Curie Actions and Erasmus. We offer a dynamic and internationally focused environment in which to advance your academic career.

The School of Law and Government:

The School of Law and Government is an ambitious school, consistently ranked in the global top 200 for politics by QS. The School teaches a BA in International Relations, an interdisciplinary degree in ‘Economics, Politics and Law’, and offers Politics on the university’s Bachelor of Arts (Joint Honours) programme. It offers seven taught postgraduate programmes in politics, the MA in International Relations, MSc in Public Policy, MA in International Security and Conflict Studies, the MSc in Climate Change: Policy, Media, and Society, the MA in European Law and Policy, and the International Master in Security, Intelligence, and Strategic Studies, delivered jointly with the University of Glasgow, Charles University, and the University of Trento. The School has over forty research students and offers a structured PhD in Politics and International Relations.
Background

INIA is a new international research network which will train a cohort of 10 early stage researchers working collaboratively to develop knowledge that will inform policy making and practice across a range of key sectors. This Innovative Training Network (ITN) is funded by the prestigious European Union’s Horizon 2020 research and innovation programme, Marie Skłodowska-Curie Actions, grant number No 859869. ITNs aim to train a new generation of creative, entrepreneurial and innovative early-stage researchers, able to face current and future challenges and to convert knowledge and ideas into products and services for economic and social benefit.

INIA addresses key issues for intersex wellbeing and rights, and it will develop topical applied outputs of relevance to stakeholders concerned to promote the wellbeing and rights of intersex people, and intellectual resources. The specific healthcare, social and human rights issues of intersex people are often overlooked. They are diverse and continue to face exposure to multiple forms of human rights violations and discrimination, requiring cross-sectoral policy responses in fields including healthcare, education, and the law. INIA will enable a consortium of 21 organisations from 10 countries to work together on issues relating to intersex people and those with variations of sex characteristics, in a unique multidisciplinary and transectoral network. INIA is being established by the University of Huddersfield in partnership with the Université Libre de Bruxelles, Dublin City University, the University of Zurich, the Escuela Andaluza de Salud Pública / Andalusian School of Public Health and the Universitat Autònoma de Barcelona as the main partners.

INIA aims to develop Intersex Studies as an interdisciplinary field, building on the existing scholarship of intersex people, and developing intellectual resources across a range of key areas. The Network consortium will bring together academic and other organisations across several European countries, in order to enable the training of a cohort of early stage researchers who will conduct research and in many cases gain PhDs. This will be achieved by the establishment of a doctoral programme, delivered by partner Universities in collaboration with NGOs (especially Intersex Activist and Advocacy organisations) and other organisations. We are appointing 10 Early Stage Researchers to take part in this doctoral programme, each with their own specific research project that will form the basis for their PhD. Each Early Stage Researcher will also help their team to deliver a work package that is relevant across the different individual research projects.

We now invite applications for a Marie Curie Early Stage Researcher role on a project about subjectivity and the lived experience and identities of intersex people and those with variations of sex characteristics. It is envisaged the post will commence on 1 September 2020. This role will be based in Dublin, at the School of Law and Government of the Dublin City University, within the PhD programme. A key opportunity provided by this post is that you will be able to do a PhD. Please be aware that the PhD programme in DCU is a 48-month programme. As this exceeds the duration of the project, you should be aware that you will have to cover the final year of your expenses outside the funding covered by this project. The post involves conducting in-depth educational literature reviews both national and international. It also involves conducting interviews with intersex people and their parents using a
hermeneutic phenomenological methodology. The post implies undertaking intersectional and interdisciplinary work to develop a deep understanding of the impact of law on the day-to-day lives of intersex people.

The project will provide knowledge to help support better practice in the future. It will involve documentary and literature analysis, qualitative research with intersex activists and advocates, and producing a number of outputs as part of your PhD work, and in addition to it, all with the assistance of your supervisors and the wider network. You will take part in, and contribute to, eight training events with the other Early Stage Researchers that will take place in a range of countries, over the duration of the research. You will also have secondments at NGOs and Universities in the Belgium, Finland and Sweden, which will enrich your training experience, research, and CV. The details of the project are:

**Research Project Title: The inculcation of awareness of intersex in education in Ireland and Sweden**

**Objectives**
Generate understanding of intersex in Irish and Swedish education. This will be examined from both policy and curriculum development perspectives and the experience of parents and children. It will focus on the knowledge and perceptions of policy makers and implementers in Government Departments of Education in both jurisdictions of intersex issues. It will also uncover experiences of people living with I/VSC and their parents, to develop implementation mechanisms for intersex equalities and human rights in Irish and Swedish education.

**Duties and Responsibilities**

- Conduct a specified programme of research under the supervision and direction of the Principal Investigator
- Assist the PI and research group in the design and development of the research programme.
- Assist the PI in the management/ co-ordination of the key aspects of the research programme (e.g. financial management, reporting, equipment management etc.)
- Engage in dissemination of the results of the research in which they are engaged to the wider research community under the supervision of the Principal Investigator
- Engage in appropriate training and development opportunities as required by the Principal Investigator, the School or Research Centre, or the University
- Engage with internal and external stakeholders including academic and industry partners/ collaborators as appropriate
- Developing and maintaining relevant documentation and SOPs
- Carry out administrative work associates with the programme as necessary

**Expected Results**

a. eBrief for both Swedish and Irish employees working in Early Years, Primary, and Secondary settings.
b. A presentation to policy makers in Ireland and Sweden.
c. Chapter for the INIA eBook for policy-makers and service-providers in both jurisdictions.
d. Systematic literature review protocol search on Prospero for international dissemination of expertise.
e. Comprehensive literature review of Irish, Swedish and international material of curriculum development and policy relating to intersex.
f. Thematic documentary analysis of educational policy.
g. Series in-depth interviews and focus groups with intersex people, their families and individuals in the education.
h. Data analysis to elicit the meanings and understandings all stakeholders have of their experience of intersex issues.

Eligibility

Applicants from all countries are eligible. However, as the network aims to foster international collaborations, applicants who are Irish nationals are only be eligible for this post if they have lived or carried out their main activity in another country for more than 24 months since May 2017. The appointed person needs to dedicate themselves to only do paid work on the INIA project for the duration of their employment contract. They will be expected to relocate to live most of the time in or close to Dublin. The INIA project language is English and thus the interviews will be held in English.

Conditions

As a Marie Curie Early stage-recruiter, you shall at the time of recruitment be in the first four years (full-time equivalent research experience) of your research career and have not yet been awarded a doctoral degree. At the time of recruitment, you shall not have resided or carried out your main activity (work, studies etc.) in the country of the host institution (Ireland) for more than 12 months in the 3 years immediately prior to the reference date. Compulsory national service and/or short stays such as holidays are not taken into account.

The successful candidate will have

- A primary degree in Education or Social Sciences equivalent to Lower Second Class Honours or above, from an approved University or an approved equivalent degree-awarding body, or have an approved equivalent professional qualification in a legal field.
- Good knowledge of education and socio–historical educational issues, including human rights education.
- Ability to maintain confidentiality and to operate in an ethical way at all times.
- Any potential conflicts of interest (such as previous collaborative or social relationships with any team members) must be declared on the application.
- Applicants need to want to undertake teaching, teamwork, knowledge transfer, management of their project and some supervision (e.g. of administrative staff) and public awareness raising.
- Required language skills:
  - A high level of English language skill is necessary as the INIA project is in English (C1 or C2).
• Skills in legal analysis.
• Methodological skills in explorative literature reviews and qualitative research.
• Ability to work in a team.
• Ability to work cross-culturally at an international level.
• Ability to travel and to work in other countries including taking part in secondments with NGOs and in academic or medical settings.
• Ability to work with a range of stakeholders including activists and advocates, medical practitioners, policy makers, the public, and academics.
• Ability to keep to deadlines and to deliver results.
• Promote our aim that INIA will ensure that all aspects of the project- training, research, decision-making, dissemination- are motivated by inclusive and diverse perspectives and experiences. It is necessary that the Marie Curie Early Stage Researcher has a commitment to equality and diversity including sex, sexual orientation, gender expression / identity, sex characteristics, race and ethnicity, age, caring responsibilities, faith, and ability. Intersex people, women, those with caring responsibilities, and those from other underrepresented groups are particularly encouraged to apply.
• The Early Stage Researcher will wish to develop their research career in the field of intersex and sex variance, and to register for a PhD. INIA will make a substantial impact on their research career development.

Desirable Criteria

• Masters Qualification
• Good knowledge of human rights education, curriculum development, gender studies, LGTBQI studies
• Experience of relevant research methods.
• Experience of some or all of the following: writing for publication, presentations, stakeholder engagement (e.g. work with NGOs), and/or media work.
• People with personal experience of intersex and/or sex variance are especially welcome to apply.
• Experience of managing issues that are sensitive, including data protection, ethics, and public facing issues.
• Experience of reporting to funders.
• Excellent communication skills, written and verbal.
• Effective presentation skills.
• Ability to solve problems independently.
• Excellent numerate skills, necessary to conduct in-depth data analysis.
• High level of IT literacy with the skills necessary to use the various IT packages.
• Attention to detail.
• Ability to conduct knowledge transfer and dissemination activities.

NOTE: There may be some flexibility regarding some of the conditions listed below, in exceptional circumstances.
Mandatory Training
The postholder will be required to undertake the following mandatory compliance training: Orientation, Health and Safety, Data Protection (GDPR). Other training may need to be undertaken when appropriate.
