

Applications are invited from suitably qualified candidates for the following position

**Senior Business Analyst
Professional 6
Academic Systems, Office of the Vice President Academic Affairs (Registrar)
Permanent contract**

Dublin City University

Dublin City University (DCU) is a leading innovative European University. It is proud to be one of the world's leading Young Universities and is among the world's top 2% globally. DCU is known as Ireland's University of Impact, with a mission to 'transform lives and societies' and focuses on addressing global challenges in collaboration with key national and international partners and stakeholders.

DCU has over 20,000 students in five faculties spread across three academic campuses in the Glasnevin-Drumcondra area of North Dublin. Thanks to its innovative approach to teaching and learning, the University offers a 'transformative student experience' that helps to develop highly sought-after graduates. DCU is currently No. 1 in Ireland for Graduate Employment Rate, and for graduate income (CSO).

DCU is a research-intensive University and is home to a number of SFI-funded Research Centres. The University participates in a range of European and international research partnerships. DCU is also the leading Irish university in the area of technology transfer as reflected by licensing of intellectual property.

As a 'People First' institution, DCU is committed to Equality, Diversity and Inclusion - a University that helps staff and students to thrive. The University is a leader in terms of its work to increase access to education, and is placed in the world's Top 10 for reducing inequalities in the Times Higher Education Impact Rankings.

Academic Systems

Reporting to the Academic Secretary, the Academic Systems unit assists the Vice President Academic Affairs (Registrar) in exercising strategic ownership and oversight of core IT applications that are integral to the academic business of the University. Working closely with colleagues in Information Systems and Services (the University's central IT department) and relevant business areas across the University, the unit provides tier 2 end-user and application support in respect of the specific for which the unit has responsibility. In doing so, it complements and enhances existing applications and

process expertise, giving particular consideration to business needs, the optimisation of applications and related process improvement.

DCU is currently in the process of implementing a cloud based Student Information System (SIS) to assist our objectives as a globally engaged university. The SIS Programme has a key role to play in the achievement of the University strategic goals, leveraging the affordances of digital technology and systems integration to enhance the experience of both students and staff, and facilitate operational excellence. The Academic Systems unit will assume responsibility for the solution that is currently being implemented. Together with other key stakeholders, the unit is actively contributing to the SIS Programme, which is a significant change programme for the University.

Role Profile

Working as part of a team, and reporting to the Head of Academic Systems, the Senior Business Analyst will be responsible for the provision of tier 2 end user and application support for those IT applications that lie within the Vice President Academic Affairs (Registrar)'s remit. The Senior Business Analyst will be expected to acquire in-depth knowledge of the applications and related business processes that the Unit supports. Liaising closely with relevant ISS and business unit colleagues, they will be responsible for the specification, configuration and implementation of application changes and upgrades, and associated process improvements, as well as the introduction of new or replacement applications, where relevant.

Duties and Responsibilities

Please refer to the job description for a list of duties and responsibilities associated with this role.

Qualifications and Experience

Essential

- A primary degree, preferably in Information Technology, Computer Science or other relevant field
- A minimum of five years' relevant work experience as a business analyst, which should include the provision of comprehensive end-user and application support and service management support, as well as experience in the provision of specification, procurement, and implementation of IT applications, preferably in Higher Education or other complex business environment
- The ability to lead and motivate colleagues
- The ability to exercise influence and judgement and to challenge positively while working with a variety of stakeholders to effect continuous improvement
- A proven track record in the management and delivery of complex projects / IT implementation.

Desirable

- Direct experience of the implementation of ITIL or other ITSM, and associated certification in same

- Experience in the use of and/or certification in project management and/or process improvement methodologies such as Prince2, Six Sigma, Lean or Agile would be advantageous.

In addition, the successful applicant will possess:

- A demonstrable aptitude for process and solution evaluation
- A clear appreciation of information technologies, in particular the following: relational databases, internet technologies, workflow, software development tools and technologies, and systems' integration techniques
- An understanding of the software development lifecycle, and an appreciation of enterprise architecture
- An understanding of academic or other complex administrative processes and related supporting technology
- Excellent interpersonal and communications skills (written and oral).
- A willingness to continue self-development in both software products and methods.
- An ability to establish and maintain trust with diverse type of stakeholders.
- A persistent outlook to learn from events and from others in the team, to conduct root cause(s) analysis of issues, and to collectively consolidate and continuously improve corporate knowledge.
- A strong attention to detail, minimizing ambiguity in all documentation produced.
- A passion for operational excellence and for providing quality service.
- A strong team and customer orientation, with ability to work under pressure to deadlines and be self-motivated.
- A sense of initiative, and of perseverance when facing setbacks or multiple intermediary steps to solutions.
- The ability to take ownership and show leadership for specific systems, while also learning other systems to second or stand-in for other senior business analysts who normally focus on these systems.

Essential Training

The postholder will be required to undertake the following essential compliance training: Orientation, Health & Safety and Data Protection (GDPR). Other training may need to be undertaken when required.

Salary Scale: 4 May 2023

Professional 6 - € 58,408 - € 83,204 refer to [DCU Payscales](#) for the applicable payscale.

Appointment will be commensurate with qualifications and experience and in line with current Government pay policy

Closing date:
