

Applications are invited from suitably qualified candidates for the following position:

Research Centre Post title School of Chemical Sciences Postdoctoral Researcher Synthetic Organic/Polymer/Materials Chemist

Level on Framework Post duration Level 1 13 Month Fixed Term Contract x2 Positions

Dublin City University

Dublin City University (DCU) is a leading innovative European University. It is proud to be one of the world's leading Young Universities and is among the world's top 2% globally. DCU is known as Ireland's University of Impact, with a mission to 'transform lives and societies' and focuses on addressing global challenges in collaboration with key national and international partners and stakeholders.

DCU has over 20,000 students in five faculties spread across three academic campuses in the Glasnevin-Drumcondra area of North Dublin. Thanks to its innovative approach to teaching and learning, the University offers a 'transformative student experience' that helps to develop highly sought-after graduates. DCU is currently No. 1 in Ireland for Graduate Employment Rate, and for graduate income (CSO).

DCU is a research-intensive University and is home to a number of SFI-funded Research Centres. The University participates in a range of European and international research partnerships. DCU is also the leading Irish university in the area of technology transfer as reflected by licensing of intellectual property.

As a 'People First' institution, DCU is committed to Equality, Diversity and Inclusion - a University that helps staff and students to thrive. The University is a leader in terms of its work to increase access to education, and is placed in the world's Top 10 for reducing inequalities in the Times Higher Education Impact Rankings.

Research Career Framework

As part of this role the researcher will be required to participate in the DCU Research Career Framework. This framework is designed to provide significant professional development opportunities to Researchers and offer the best opportunities in terms of a wider career path.

Background & Role

The School of Chemical Sciences at Dublin City University invites applications for **two** postdoctoral researchers in synthetic organic/polymer/materials chemistry to work on a collaborative project on the development of depolymerisation techniques for the chemical recycling of textile waste, and the production and testing of sustainable polyurethane insulation foams. The positions are available from February 2024, for 13 months, with the possibility of extension (pending the award of additional external funding). The project will be led by Dr Susan Kelleher and involve collaboration with the Dr Jennifer Gaughran in the School of Physical Sciences, DCU. This is a Science Foundation Ireland funded project under the National Challenge Fund scheme (https://www.sfi.ie/challenges/) and is in collaboration with the Rediscovery Centre in Ballymun.

Principal Duties and Responsibilities

Please see the Job Description for a full list of duties and responsibilities:

Minimum Criteria

Individuals should have a PhD in organic/polymer chemistry or a related field e.g. materials science. In addition, it is desirable that the individual has experience in:

- Material synthesis/fabrication and characterisation.
- Working in multidisciplinary and high collaborative projects, and possess excellent communication and writing skills, as evidenced by the production of publications/ reports.

individuals will be assessed on the following competencies:

Discipline knowledge and Research skills – Demonstrates knowledge of a research discipline and the ability to conduct a specific programme of research within that discipline

Understanding the Research Environment – Demonstrates an awareness of the research environment (for example funding bodies) and the ability to contribute to grant applications

Communicating Research – Demonstrates the ability to communicate their research with their peers and the wider research community (for example presenting at conferences and publishing research in relevant journals) and the potential to teach and tutor students

Managing & Leadership skills - Demonstrates the potential to manage a research project including the supervision of undergraduate students

Essential Training

The postholder will be required to undertake the following essential compliance training: Orientation, Health & Safety, Data Protection (GDPR) and all Cyber Security Awareness Training. Other training may need to be undertaken when required.

Salary Scale:

IUA Postdoctoral Researcher Salary Scale - €42,783 - €49,177 (Point 1 – Point 6)

Appointment will be commensurate with qualifications and experience and in line with current IUA pay policy

Closing date: Thursday, 23rd November 2023

For more information on DCU and benefits, please visit Why work at DCU?

Informal Enquiries in relation to this role should be directed to:

Dr. Susan Kelleher, School of Chemical Sciences, Faculty of Science and Health, Dublin City University. Phone + 353 (0)1 7006167 Email: susan.kelleher@dcu.ie

Please do not send applications to this email address, instead apply as described below.

Application Procedure:

Application forms are available from the DCU Current Vacancies website at https://www.dcu.ie/hr/vacancies-current-vacancies-external-applicants

Applications should be submitted by e-mail with your completed application form to <u>hr.applications@dcu.ie</u>

Please clearly state the role that you are applying for in your application and email subject line: #RF1937 Postdoctoral Researcher Synthetic Organic/Polymer/Materials Chemistry

Dublin City University is an equal opportunities employer. In line with the Employment Equality Acts 1998 – 2015, the University is committed to equality of treatment for all those who engage with its recruitment, selection and appointment processes. The University's Athena SWAN Bronze Award signifies the University's commitment to promoting gender equality and addressing any gender pay gaps. Information on a range of university policies aimed at creating a supportive and flexible work environment are available in the <u>DCU Policy Starter Packs</u>
