Welcome from the President

Dublin City University (DCU) is a research-intensive, globally-engaged, dynamic institution that is distinguished not only by the quality and impact of its graduates, but also by its focus on the translation of knowledge into societal and economic benefit. Since admitting our first students in 1980, DCU has grown rapidly and, today, our graduates are playing key roles in many sectors nationally and internationally.

Our academic quality, our innovative research and our engagement with industry have built an international reputation for excellence and DCU is consistently ranked among the world's leading young universities. DCU is Ireland's fastest growing university and hosts more than 17,400 students. We offer a broad range of innovative degree programmes across our five faculties, along with our online DCU Connected provision.

One of the key characteristics required of graduates today, and of the university from which they graduate, is openness, responsiveness and adaptability to change. We aim to help our students become lifelong learners with the skills they need to flourish in a dynamic and changing world. DCU promotes these characteristics in a number of ways, including leading in the development of new flexible methods of course delivery.

The digital society in which we live has led to fundamental changes in education and DCU is embracing these changes. The National Institute for Digital Learning (NIDL) at DCU builds on our reputation as a leader in the area of online, blended and distance learning and is pioneering a range of R&D initiatives. The fact the NIDL is hosting this year's World Conference on Online Learning is evidence of our international standing.

Our online courses on Irish Language and Culture delivered in partnership with Fiontar agus Scoil na Gaeilge and FutureLearn have already attracted over 45,000 learners from more than 136 countries. These courses are co-funded under the Twenty-Year Strategy for the Irish Language by the Department of Culture, Heritage and the Gaeltacht with support from the National Lottery. Building on this excellent achievement, DCU Schools and Faculties are developing a wide range of programmes aimed at global learners on the FutureLearn platform.

DCU is committed to harnessing the potential of new digital technologies to ensure that students have the best possible learning experiences, whether they are on, or off, campus.

DCU Connected encompasses all DCU courses and programmes offered in an online format. Launched in 2014, DCU Connected was developed to allow students, wherever they live, to have access to DCU's increasing number of world-class online programmes. Of particular significance was the approval last year of our BA Humanities (Psychology Major) by The Psychological Society of Ireland (PSI), the first course of its kind in Ireland to receive this prestigious accreditation, and our University of Sanctuary Scholarship Scheme.

As with all DCU programmes, those offered through DCU Connected are of the highest academic quality. This means that if you choose a programme offered through DCU Connected you will not be disappointed!

I look forward to engaging with you through DCU Connected!

Professor Brian MacCraith
President
Dublin City University

What is DCU Connected?

DCU Connected is the platform we use to describe courses available to students who choose a flexible study option. These options encompass undergraduate and postgraduate programmes, transnational initiatives and short courses where students are primarily studying online, off-campus and/or through one of our strategic partners.

DCU has over 30 years providing what was traditionally known as 'distance education', delivering a fully accredited DCU degree to people that could not commit to full time, on-campus learning. DCU Connected is the evolution of this delivery mode but with a much wider focus. Importantly, the term 'connected' reflects a particular philosophy we have about learning in the new digital world.

We no longer call it a distance education, because it isn't. You will feel as close and engaged as any of our on-campus students, maybe even more so. This type of learning is no longer at the edge of the university experience, it is at the very heart of it.

We call it a connected education, connecting you to a quality education wherever you are. To world-class courses and professional development opportunities in strategically important areas. To international experts and engaging teachers at the leading edge of their disciplines. To fellow students who share a passion for learning and interest in the subject. Every DCU student has access to the same opportunities, some

just access them from further away. Another key feature of DCU Connected is the way it fits our mission of transforming lives and societies. We take this mission seriously. At DCU we realise that not everyone has the option of undertaking full time, on-campus study. For these students, our aim is to provide flexible access to fully accredited DCU programmes.

We are committed to offering globally recognised qualifications that provide a perspective on some of the major challenges and opportunities facing the world. However, in today's globally connected world we also understand the importance of developing local capacity and customising our programmes to meet local needs. That is why there is a lot more to DCU Connected than simply offering a suite of online degree programmes.

Online platforms are changing the traditional teaching and learning paradigms. Technology now enhances both choices and flexibility. With DCU Connected, learning happens any time, any place.

The DCU Connected Student Experience

Flexibility

Online learning suits so many different lifestyles. With this medium of education, you can fit your study in with work commitments, parenting or other family commitments, travel abroad etc. Many of our students have told us that without the flexibility of online learning, they would never have been able to complete their studies.

Studying through DCU Connected

One of the really good things about online learning is that it will take you mere seconds to reach your classroom – no travel, parking or making your way through buildings etc. Loop, which is DCU's online learning environment, offers platforms to hold discussions, access to your course materials and to the vast array of online materials (such as journal articles) supplied by DCU's Library – all of which are accessible to you from anywhere with an internet connection.

Many of DCU connected courses also provide “live” online tutorials, which means that you can “attend” tutorials and interact with your tutors and fellow students in real time – we use a software package similar to Skype, which is designed for educational purposes. For example, instead of raising your hand, you'll click the “raise hand” button to notify the tutor. Undergraduate programme tutorials involve a combination of online and face to face tutorials, while postgraduate programmes only use online tutorials. You will submit nearly all your continuous assessment work online – meaning your work gets delivered on time without having to negotiate a post office queue or search for stamps...simply upload your assignment and hit “submit”.

The Challenge

While online learning offers unique flexibility, knowing what is required of you as a student is essential for your success. Entering into a programme with clear expectations will make your transition to studying a lot easier – after all, your studies will be fitting in with many other things in your life, so having as much knowledge as possible starting off can only be to your benefit. We strongly recommend that you:

- Read the detailed material provided online about the programme you are interested in
- Check out the Frequently Asked Questions section
- In particular, take note of the recommended study hours per module
- If you can, attend one of the DCU Connected open evenings - see the DCU Connected website at: dcu.ie/connected
- If you have any unanswered queries, please get in touch with us by phone at 01 7005481, or email us at: connected@dcu.ie

Finding time to study

One of the strongest pieces of advice from our current students is that it is important to take the time to plan the academic year (normally September – May). Identifying your key dates from the start of the year, and scheduling your study time will get you off to a great start – and also gives you an element of control over managing your time to your best advantage. Make a note of every event you can think of coming up as they apply to you – work commitments, children's activities and school schedules, your spouse's schedule etc. Make a note of the dates that continuous assessment work is due, exam dates and work out where you will get your hours to study. Of course, things will happen in between despite the best-laid plans – but at least you will have the full picture in front of you to identify windows of opportunity to get assignments completed.

DCU Student Life

As a DCU Connected student, you may not be on campus very often – but you are still able to avail of all the services available to any DCU student.

These include:

- The Library
- Careers Service
- Sports Facilities
- Student Advice Centre
- Counselling and Personal Development Service
- Maths Learning Centre
- Disability and Learning Development Service
- DCU Student ID Card
- Registry

Despite the fact that you are not primarily campus-based for your studies, assistance from DCU staff is always on hand – by phone, email or visit us in person.

Student Services and Support

Student Support with DCU Connected includes the following:

- Online learning materials and other study resources
- Online tutor/lecturer support
- Online learning environment (Loop)
- Online library
- Online assessment

Online Materials and Study Resources

For each module you study, you are given access to online learning materials. These can be in the form of written materials; videos; activities and other online resources. You will also have online access to the extensive resources provided by the DCU Library. In addition, for most modules, you will also be required to obtain a small number of selected textbooks.

Assessment

On most modules on the DCU Connected undergraduate programmes, assessment takes the form of continuous assessment and an end-of-year examination.

Normally, the continuous assessment takes the form of one or more assignments that have to be submitted by designated dates throughout the academic year. The end-of-year examinations take place in May with re-sits in August. On the DCU Connected postgraduate programmes, assessment is mainly by continuous assessment only. This normally takes the form of three assignments per module. See programme information for further details.

Undergraduate Programmes

BA in Humanities (BAH)

Undergraduate

Whether you are interested in pursuing a career in a specific discipline, for example Literature or Sociology, or are seeking a broad-based undergraduate education, the Bachelor of Arts (Hons) in Humanities provides you with the means to achieve your goals.

Students can choose to explore a wide breadth of Humanities subject areas, while also specialising in at least one of the subject areas they find most rewarding. This degree programme's strength lies in its academic quality and its flexibility.

Understanding the Course

The DCU Bachelor of Arts in Humanities is a Level 8 (on the National Framework of Qualifications) honours degree programme. Students undertaking this degree choose to study a selection of modules in History, Literature, Philosophy, Sociology and Psychology.

Course Structure

As a student on this degree programme you may choose to study from a range of modules in the following Humanities subject areas:

- 1 History
- 2 Literature
- 3 Philosophy
- 4 Psychology
- 5 Sociology

To complete the Bachelor of Arts (Honours) in Humanities you need to complete twelve modules, with at least five modules in one subject area. Students may choose to exit with a Diploma in Humanities on completion of eight modules. Each module is awarded 15 European Credit Transfer System (ECTS) credit points. These points are accumulated towards the award of your degree. 180 ECTS credit points are

required for the Bachelor of Arts (Hons) in Humanities and 120 ECTS credit points are required for the Diploma in Humanities.

Career Prospects

The Bachelor of Arts (Hons) in Humanities programme facilitates those interested in pursuing any kind of work that requires critical thinking skills, high-quality written expression and transferable skills such as organisation and time-management. All these skills and abilities are highly valued by employers. Many people also enter their studies with the ambition of becoming a post-primary teacher.

BA in English and History (BAEH)

Undergraduate

This programme is designed to develop students' knowledge and understanding of the English and History subject areas, and is therefore tailored to be suitable for anyone who wishes to focus specifically on these subjects in their studies, whether for personal or professional reasons.

The Bachelor of Arts (Hons) in English and History programme offers you the attractive opportunity to obtain a DCU undergraduate degree through online learning.

Understanding the Course

The DCU Bachelor of Arts in English and History is a Level 8 (on the National Framework of Qualifications) honours degree programme, which provides students with a focused, tailored course of education in English and History.

Course Structure

The English and History subject areas are each presented as a suite of six modules. To complete the Bachelor of Arts (Hons) in English and History you need to complete the twelve modules in these two subjects as detailed in the table below. Students may choose to exit with a Diploma in English and History on completion of eight modules if they do not wish to progress to the degree qualification. Each module is awarded 15 European Credit Transfer System (ECTS) credit points. These points are accumulated towards the award of your degree. 180 ECTS credit points are required for the Bachelor of Arts (Hons) and 120 ECTS credit points are required for the Diploma in English and History.

History

The History subject stream equips students with a wide range of skills and techniques upon which historical research and writings are based. Students will engage in the critical examination of historians' works, and the evaluation of primary sources, and will acquire the conceptual tools with which our view of the past is shaped. The modules provide perspectives on major themes in Irish and European political, economic, social and cultural history from the close of the Middle Ages to the 20th century.

Literature

The Literature subject stream equips students with the skills and techniques to discriminate between literature and other forms of writing and representation, taking account of contemporary perspectives in criticism and theory, including feminism, historicism and post-modernism. Irish, British, American and other literature in English will be evaluated in terms of their contribution to cultural formation. Students will encounter competing ideas about writing and literature, within different historical and national frameworks.

Career Prospects

The Bachelor of Arts (Hons) in English and History degree programme facilitates those interested in pursuing any kind of work that requires critical thinking skills, high quality written expression, and transferable skills such as organisation and time-management. All these skills and abilities are highly valued by employers. Many people also enter their studies with the ambition of becoming a post-primary teacher.

BA in Humanities (Psychology Major) (BAPY)

Undergraduate

This programme is designed to develop students' knowledge, skills and competencies in Psychology, and is therefore tailored to suit anyone who wishes to study Psychology at undergraduate level; whether for personal or professional reasons. The programme is accredited by the Psychological Society of Ireland (PSI).

You may have: a general interest in studying behaviour, thoughts, feelings, motivations etc.; a specific interest in one area of Psychology, for example Social Psychology or Counselling Psychology, or; a specific interest in one of the fields in which Psychological knowledge, skills and competencies can be applied, such as education or health.

Understanding the Course

The DCU Bachelor of Arts in Humanities (Psychology Major) is a Level 8 (on the National Framework of Qualifications) honours degree programme, which provides students with a focused, tailored programme of education in Psychology. The programme is accredited by the Psychological Society of Ireland (PSI), which ensures that the programme meets the highest standards for undergraduate, pre-professional education and training in Psychology.

Course Structure

On this programme you will study nine Psychology modules, which cover the core areas of Psychology. As part of this programme you will also have the opportunity to complete, under supervision, an independent research project in Psychology. In addition to the Psychology modules, you will study three Sociology or three Philosophy modules that will complement your studies in Psychology. The choice of Sociology or Philosophy must be made in a student's first year of study. Once the student has completed the foundation level module in either subject area, the choice of two from the following can then be made for that subject:

Sociology:

- SC200 - Sociology of the Lifecourse
- SOC3A - Power, Social Order, Crime, Deviance, Work and Employment
- SOC4 - Social Inequality and Intergroup Relations

Philosophy:

- PH200 - What can I know: the philosophy of knowledge
- PHIL3 - Philosophy of Values: Ethics and Aesthetics
- PH220 - Philosophy of Education: Teaching, Pedagogy and Practice. To complete the Bachelor of Arts (Hons) in Humanities (Psychology Major) a student needs to successfully complete the twelve modules from these two subjects

Students may choose to exit with a Diploma in Humanities (Psychology Major) on successful completion of eight modules, if they do not wish to progress to the full degree qualification. It should be noted that this Diploma is not a route to graduate membership of the Psychological Society of Ireland, and therefore, it is not a route into the field of Psychology. Each module is awarded 15 European Credit Transfer System (ECTS) credit points. These points are accumulated towards your award of degree. 180 ECTS credit points are required for the Bachelor of Arts (Hons) and 120 ECTS credit points are required for the Diploma.

BA in Humanities (Psychology Major) (BAPY)

Undergraduate

Career Prospects

The knowledge, skills and competencies relating to Psychological research methods that graduates will achieve on completing this programme, will allow them to work in junior researcher positions. Graduates from the Bachelor of Arts (Hons) in Humanities (Psychology Major) programme who intend to qualify as professional Psychologists will need to pursue further training in Psychology at Masters or Doctoral level. Graduates from the Bachelor of Arts (Hons) in Humanities (Psychology Major) will be able to go on to postgraduate study, and careers, in a number of Psychology's subdisciplines and related fields.

Graduates may proceed to either a taught masters or doctoral programmes in a specific sub-discipline of Psychology, or a Psychology masters or doctorate by research, where they conduct a research project, under supervision, in their area of interest.

Having completed an MBA previously by distance learning, I knew this was a medium that would facilitate my work-life balance with my love of learning. As a mother of two teenagers and working part-time, online distance learning allowed me to work the programme in around my busy schedule. Being able to split the modules over the years was a major bonus. In the years where we were an exam house, I cut back to one or two modules, other years when home life was less about teenage angst, I could take on a larger workload.

This is a programme that requires discipline and commitment, however, I was rewarded in that I developed a new set of skills in drafting, analysis, presentation and delivery, as well as mastering new forms of media communication for group projects and discussion forums. While getting an honours degree was the desired outcome, the sense of personal achievement and development of self-worth were the real rewards.

Treasa Faulkner
BA in Humanities, 2019
Chartered Company Secretary

Bachelor of Arts Single Module (BASM)

Undergraduate

The Bachelor of Arts Single Module (BASM) allows students to undertake study at university degree level for personal enjoyment or for continual professional development purposes without having to commit to study towards a degree.

Teachers who wish to up-skill and become registered with the Teaching Council may use the BASM programme in order to accomplish this goal.

Understanding the Course

Bachelor of Arts Single Module (BASM) students study a small number of modules at degree level (level 8 on the National Framework of Qualifications) for personal enjoyment or continual professional development without having to commit to study towards a degree or diploma. Of specific interest to BASM students who are post-primary teachers is that the History, Literature, Philosophy and Sociology modules meet the Teaching Council of Ireland criteria for general registration in relation to the teaching of History (History), English (Literature) CSPE (Sociology) Environmental and Social Studies (ESS) (History); and Politics and Society (History or Philosophy, Sociology). Teachers who wish to up-skill and become registered in one of these subject areas may use the BASM programme in order to accomplish this goal.

Career Prospects

The studying of individual modules will develop skills such as critical thinking, high quality written expression, and transferable skills such as organisation and time-management. The knowledge, abilities and skills you will develop are highly valued by employers and will also be useful and valuable to you should you undertake any further study. Many Bachelor of Arts Single Module (BASM) students are existing teaching staff who enhance their teaching prospects by adding another subject to their repertoire.

BSc in Information Technology (IT)

Undergraduate

The programme should be of particular relevance if you are working or aspiring to work in the dynamic IT/Software industry, especially if you have no third-level IT qualification or have an IT qualification lower than an honours degree. This programme provides students with critical insight into the application of Information Technology to the processes of management, innovation and administration within a range of organisations.

Understanding the Course

This BSc in Information Technology is a level 8 honours degree awarded by DCU. The course is delivered primarily online, augmented with some face to face attendance. Modules at Level 1 and Level 2 are worth 15 European Credit Transfer System (ECTS) credits each. Degree level modules are worth 20 ECTS credits each.

Technology and Online Skills required

Your learning experience as a DCU Connected student is enhanced through the use of rich digital media. You can find detailed information on the necessary equipment and skills required for DCU Connected students at: dcu.ie/connected/Technology-Skills-Requirements.shtml

Mathematics - Recommendation

It is recommended that applicants have successfully studied mathematics at Leaving Certificate level. For those of you who have not studied Maths in a long time, we recommend you review the content in our Preparatory Maths Module, available online after you have registered.

Credit for Prior Learning

If you have been in higher education before you may be able to get credit for courses you have successfully completed. It is essential to hold at least 120 ECTS credits at level 7 in order to be eligible for Direct Entry which allows candidates to complete the degree in two years. For more information contact: ict.openeducation@dcu.ie

Course Structure

The programme consists of an integrated series of modular courses outlined in the table below.

Students must successfully complete fourteen (14) modules, equating to 240 ECTS credits, to be eligible for the award of a degree. Students may choose to exit with the award of a Diploma on completion of the eight (8) modules at Level 1 and Level 2, equating to 120 ECTS credits.

BSc in Information Technology

BSc in Information Technology (IT)

Undergraduate

Career Prospects

You will graduate from this programme with a unique mix of skills in computing and business.

Graduate roles include:

- Software Developer
- Mobile App Developer
- Embedded Systems Developer
- Front End Developer
- Cloud Developer
- DevOps Engineer
- IT Project Manager
- Technical Writer
- Software Support Specialist
- Software Tester

In addition to traditional ICT career paths, graduates of this programme will have the skills to pursue innovation and entrepreneurship by starting their own ICT-enabled businesses.

Additionally, you will develop many transversal skills such as critical thinking, time-management, communication, collaboration, evaluation, and of course digital skills. All these skills are highly valued by employers.

dcu.ie/connected

For me, this was a second chance to “get education right”. When I was younger I finished secondary school and went straight into life as a full time athlete. Life was good and I never gave the years after athletics a second thought. An injury stopped everything, when I saw the opportunity to study at DCU I had to take it and it is a decision that I will never regret. Employability and a higher salary are the main reasons to pursue a degree and getting one from an Irish University greatly improves your chances in both of those areas. On a practical level, having a university degree means more job openings, more chances at promotions and more flexibility in terms of which jobs to take and keep.

In relation to choosing an online or distance learning mode of study, the benefits for me were immense. The online learning environment was also of great help. All students ask any questions they may have in relation to course work, assignments, tutorials etc. in an open forum. It created a community feel and even though you may rarely meet some of your fellow students, you still felt part of the DCU community.

Freelance Programmer

BSc in Management of Information Technology/ Information Systems (IT/IS)

Undergraduate

The programme should be of particular relevance to those working or aspiring to work in the Management of IT/IS, especially those with no third-level qualification or with a sub-honours degree qualification. The programme is designed particularly for those interested in the management of Information Technology and Information systems and/or using IT to promote enterprise or institutional development and renewal. The course should also be of interest to those attracted to a career in industrial training and/or teaching positions in IT. The programme equips students with competence in the Management of Information Technology/ Information Systems with a critical appreciation of its potential application to the processes of innovation.

Understanding the Course

This BSc in Management of Information Technology and Information Systems is a level 8 honours degree awarded by DCU. The course is delivered primarily online, augmented with some face to face attendance. Modules at Level 1 and Level 2 are worth 15 European Credit Transfer System (ECTS) credits each. Degree level modules are worth 20 ECTS credits each.

Certificate in Peer Support Working in Mental Health

Undergraduate

This course is for people who would like to be Peer Support Workers or Family Peer Support Workers in the area of mental health. This course will help you develop your knowledge and skills in order to develop your practice as peer support workers in mental health inpatient and community settings.

The programme is aimed at Peer Support Workers. In addition to improving your knowledge and competence in working and developing practice in this area, you'll enhance your professional profile. You'll broaden your career horizons, to include the areas of:

- Peer Advocacy
- Peer Education
- Healthcare
- Recovery

Framework of course

This is the only accredited award programme in Ireland in Peer Support Working and it is the established standard for Peer Support Workers employed by the HSE. Innovative teaching methodologies place students' learning styles, and needs at the core of teaching and learning activity. Course assessments involve critical thinking, reflection and are based on practice, assignments are transformatory and are personally applicable to the students' workplace.

How is the course taught

The Certificate consists of three modules delivered on a part-time basis over two semesters. The course involves attendance in two-day blocks every two weeks during the semester (16 in total) and ten days on-line work through loop.

Entry Requirements

Peer Support Workers will have a previous history of mental health problems and be in recovery or recovered. Family Peer Support Workers will have experience of supporting someone with mental health problems.

Potential students will be interviewed prior to commencement of the programme. This process will provide an opportunity for DCU staff to review the educational academic entry point of the student and apply RPL guidelines.

In addition to 'expertise by experience' and 'family supporter experience' there are a number of entry criteria:

- Evidence of critical thinking, literacy, communication/writing skills at level 5 NFQ. This can be in the form of formal qualifications (e.g. Leaving Certificate) or the equivalent
- Where applicants do not have formal level 5 NFQ qualifications they will be assessed through Recognition of Prior Learning (RPL)

If you have any questions when applying for this course please contact Martha Griffin for information and guidance.

Postgraduate Programmes

Graduate Diploma/MSc in Management of Operations (MOPS)

Postgraduate

This online programme enables students to grow into senior operations management roles in technology-intensive organisations, in the financial sector, in supply chain management, manufacturing or services organisations, in both the public and private sectors. Learners will gain a critical awareness of current opportunities and new insights into operations management in varied environments.

Learners will also develop the range of investigative and analytic skills and techniques required to equip them to assume senior roles within organisations in the public and private sectors.

Understanding the Course

The aim of this programme is to develop the management of operations knowledge and skills to enable students to grow into senior roles in dynamic, technology-intensive manufacturing or services environments. On completion of the programme, students will have a critical awareness of current challenges and new insights into Operations Management in dynamic, high technology services or manufacturing environments. They will have developed new transversal business skills and will be able to select the appropriate tools to apply to a variety of business challenges. The programme will provide graduates of different disciplines with a unique opportunity to develop the hybrid, interdisciplinary knowledge and skills essential for modern business development and management. Students will also develop the range of investigative and analytic skills and techniques required to equip them to assume managerial or senior roles in organisations.

Course Structure

Year 1 (30 Credits)	Normal Timeframe	Credits
Project and Change Management	Sept-Jan	15
Sustainable Business	Jan-May	15
Year 2 (60 Credits)	Normal Timeframe	Credits
Management of Operations	Sept-Jan	15
Evidence Based Evaluation and Entrepreneurship	Jan-May	15
Dissertation	Sept-Jul	30

You are also required to complete a research proposal during the summer period between Year 1 and Year 2.

To complete a Masters Degree, 5 modules are required, a Postgraduate Diploma requires 4 modules, and a Postgraduate Certificate, 2 modules.

Career Prospects

Graduates of this programme tell us how they have grown in confidence as a result of coming to understand the theory underpinning professional practice brought about by their studies. This confidence, together with their increased understanding and knowledge, has helped them to become more strategic and meaningful contributors in the workplace and to engage at a more senior level.

As high level academic qualifications are becoming increasingly important to organisations' recruitment and promotion policies, this degree will add long-term value to your career.

Graduates of this programme are currently employed in manufacturing and service organisations across a wide range of sectors including the retail, food and beverage, pharmaceutical and electronics industries. Many are also self-employed.

Understanding the Course

The overall aim of the programme is to develop your knowledge and skills in areas such as Cloud Computing and Social Networking so that you can manage and apply key Internet Systems strategies to your organisation. Specifically the programme will combine an overview of the strategic applications and management of these technologies with an investigation of the underpinning technological principles, and how selected societal and commercial issues relate to their use and management.

Course Structure

Year 1 (30 Credits)	Normal Timeframe	Credits
Project and Change Management	Sept-Jan	15
Sustainable Business	Jan-May	15
Year 2 (60 Credits)	Normal Timeframe	Credits
Management of Internet Enterprise Systems	Sept-Jan	15
Evidence Based Evaluation and Entrepreneurship	Jan-May	15
Dissertation	Sept-Jul	30

You are also required to complete a research proposal during the summer period between Year 1 and Year 2.

To complete a Masters Degree, 5 modules are required, a Postgraduate Diploma requires 4 modules, and a Postgraduate Certificate, 2 modules.

Career Prospects

This programme will enable you to understand, develop and manage emerging technologies in the networked society and have a critical awareness of current problems and new insights associated with the Web, Cloud Technology, Social Networks and related technologies. You will develop a range of investigative and analytical skills and techniques required to equip you to assume and develop managerial or senior roles within your organisation or within your own business.

As top level academic qualifications are becoming increasingly important to organisations' recruitment and promotion policies, this programme will help you to advance your career, whether you are an experienced professional or a recent graduate. Graduates of this programme are currently employed in both the public and private sectors in organisations that are seeking to use internet technologies for competitive advantage. Many are also self-employed.

Graduate Diploma/MSc in Management of Information Systems Strategy (MISS)

Postgraduate

The programme will be of particular relevance to students with competencies in Information Systems and those working or aspiring to work as a manager in Information Technologies (IS/IT). You will gain the skills and knowledge in information systems and technologies which will enable you to manage more confidently in an environment where information systems both drive and serve business, to align Information Strategy with the overall business strategy and to contribute meaningfully to ongoing Information Strategy development in the public and private sectors and those who are self-employed in this field.

Understanding the Course

On completion of the programme, you will gain an understanding of the role of IS/IT in the processes of innovation, management and administration associated with modern organisations. You will also gain a critical awareness of current problems and new insights associated with the management of Information Systems in dynamic, high technology manufacturing or services environments. Finally, you will develop the range of investigative and analytic skills required to equip you to assume managerial or senior roles within your organisations.

Course Structure

Year 1 (30 Credits)	Normal Timeframe	Credits
Project and Change Management	Sept-Jan	15
Sustainable Business	Jan-May	15
Year 2 (60 Credits)	Normal Timeframe	Credits
Management of Information Systems Strategy	Sept-Jan	15
Evidence Based Evaluation and Entrepreneurship	Jan-May	15
Dissertation	Sept-Jul	30

You are also required to complete a research proposal during the summer period between Year 1 and Year 2.

To complete a Masters Degree, 5 modules are required, a Postgraduate Diploma requires 4 modules, and a Postgraduate Certificate, 2 modules.

Career Prospects

This programme will provide you with a range of competencies in Information Systems and Technologies together with the theoretical framework which will support, enhance and develop your existing practical knowledge. It will enable you to manage confidently and strategically in an environment where information systems both drive and serve business.

Furthermore, this degree will add long-term value to your career as high level academic qualifications are becoming increasingly important to organisations' recruitment and promotion policies. Graduates of this programme are currently both self-employed and employed in a wide range of organisations in both the public and private sectors.

Understanding the Course

The overarching aim of the course is to provide a programme for those who wish to develop their professional skills from a sustainable management perspective through part-time study and at a distance. This programme provides students with an understanding of the theoretical, practical and legal aspects of modern environmental practices. It seeks to develop in students an understanding of the key management functions required in business, including strategic management, project management and risk assessment.

On completion, students will be able to carry out research on a range of focused topics, involving data collection, critical analysis, interpretation and to present them in a report format. The programme's main philosophy is that for business to be sustainable in the long-term, a successful manager must effectively manage the whole of the business' resources, including environmental, economic and social resources, from a sustainable, global perspective.

Course Structure

Year 1 (30 Credits)	Normal Timeframe	Credits
Project and Change Management	Sept-Jan	15
Sustainable Business	Jan-May	15
Year 2 (60 Credits)	Normal Timeframe	Credits
Management for Sustainable Development	Sept-Jan	15
Evidence Based Evaluation and Entrepreneurship	Jan-May	15

You are also required to complete a research proposal during the summer period between Year 1 and Year 2.

To complete a Masters Degree, 5 modules are required, a Postgraduate Diploma requires 4 modules, and a Postgraduate Certificate, 2 modules.

Career Prospects

The blend of skills developed in this programme ensures graduates are suitable for any role in which Sustainable Development is important, which today is almost every sector of the economy. As a graduate of this programme you will have a thorough understanding of best practice in the rapidly growing area of Sustainable Development and will have the knowledge and skills to develop and implement best practice and sustainable strategies in both the public and private sectors. This degree will add long-term value to your career, regardless of your existing role.

Graduate Diploma/MSc in Management of Clean Technologies (MCT)

Postgraduate

The Management of Clean Technologies online programme will enable learners to apply their engineering or technical background to grow into senior managerial roles in the Clean Technology sector.

The programme's main philosophy is that for a business to be successful and competitive in the long-term, the whole of the business' resources, including environmental, economic and social resources, must be managed from a perspective that integrates the growing importance of Clean Technologies and the contribution they have to make to economic competitiveness.

The programme is designed to give graduates the technical and mathematical skills to effectively measure and analyse the use of Clean Technologies with a view to improving efficiency, effectiveness and value for money.

Understanding the Course

The overarching aim of the MSc in Management of Clean Technologies is to provide a programme for graduates who wish to develop professional and managerial competencies in the Clean Technology sector. This programme is primarily aimed at those with an engineering or technical background. It should be noted that the programme has a strong technical emphasis and aims to give graduates the technical and mathematical skills to effectively measure and analyse the use of Clean Technologies.

Course Structure

Year 1 (30 Credits)	Normal Timeframe	Credits
Project and Change Management	Sept-Jan	15
Sustainable Business	Jan-May	15
Year 2 (60 Credits)	Normal Timeframe	Credits
Management for Clean Technologies	Sept-Jan	15
Evidence Based Evaluation and Entrepreneurship	Jan-May	15
Dissertation	Sept-Jul	30

You are also required to complete a research proposal during the summer period between Year 1 and Year 2.

To complete a Masters Degree, 5 modules are required, a Postgraduate Diploma requires 4 modules, and a Postgraduate Certificate, 2 modules.

Career Prospects

The blend of skills developed in this programme ensures graduates are suitable for any role in which the management of clean technologies is important. It covers the environmental issues surrounding industrial processes, including the legislative framework.

Graduates from this programme will have the knowledge and skills to minimise pollution and resource usage in a manufacturing organisation. As Clean Technologies become increasingly important to all sectors of the economy, this degree will add long-term value to your career, regardless of your existing role.

Postgraduate Single Module (PGSM)

Postgraduate

Whether you are interested in up-skilling, for example you already have a Masters qualification in business, but wish to learn more about information technology, or are seeking to study for personal achievement, the DCU Postgraduate Programme Single Module (PGSM) Level 9 programme provides you with the means to achieve your goals. The Postgraduate Programme Single Module (PGSM) offers you the opportunity to study, at Masters Level through distance education, without having to commit to a full-time, or part-time, campus-based programme.

Understanding the Course

Postgraduate Single Module (PGSM) students undertake study at Masters level (level 9 on the national framework of qualifications) modules for personal achievement or continual professional development (CPD) without having to commit to study towards an exit award. This means you can study for one semester in a topic of interest, whether this is Information Technology, Management of Operations or Environmental Management.

All PGSM modules run from the end of September until mid-January on a part-time basis.

As a PGSM student you will have access to learning materials and will be supported through online tutorials using the most current, online, 'live' classroom technology, a virtual learning environment called Loop, email etc. and a dedicated postgraduate support service. The format of assessment will depend on the module being studied, but typically will include contributions to online discussion fora, case studies and individual assignments.

Course Structure

Once registered, you can choose from the modules listed below.

- OSC10 Management of Operations**
(15 credits)
- OSC11 Information Systems Strategy**
(15 credits)
- OSC12 Management of Internet Enterprise Systems**
(15 credits)
- OSC14 Management of Sustainable Development**
(15 credits)

Full information on the learning outcomes and content of each module can be found on the DCU Connected website: dcu.ie/connected

If you have completed the modules and you wish to enrol on the full Masters programme, you may progress to do so.

Career Prospects

The Postgraduate Programme Single Module (PGSM) allows student to undertake study at university masters degree level for personal achievement or continual professional development (CPD) purposes without having to commit to study towards an exit award. The studying of individual modules will develop skills such as critical thinking, high quality written expression, and transferable skills such as organisation and time-management.

The knowledge, abilities and skills you will develop are highly valued by employers. In addition, if you wish to pursue further study in this area, you will have achieved 15 ECTS credits towards a Postgraduate qualification. For more information about these qualifications, please refer to the relevant pages of this prospectus.

Masters in Special Educational Needs (MSEN) NFQ - Level 9

Postgraduate

The philosophy underlying the Masters in Special Educational Needs is embodied in the overall aim of the School of Inclusive and Special Education to support the rights of all children and young people to an appropriate education and to learning for all. Graduates will develop the skills and knowledge to contribute to and lead the development of a culture of critical analysis, research, and innovative practice in inclusive and special education.

The Programme

The Masters in Special Educational Needs(MSEN) is a blended programme open to qualified experienced teachers working in primary and post-primary schools, in special schools or classes or in other recognised educational centres. The aim of the programme is to develop teachers' knowledge and skills in analysing, critiquing and applying research literature in the area of special and inclusive education and in carrying out research relevant to children and young people with learning difficulties, additional support or special educational needs. For further information please see the website.

How is the course taught?

The MSEN year one is fully online. The MSEN year two comprises a week's Summer course in early July, a small number of face-to-face lectures on two Saturdays in semester one and online lectures during the first and second semesters. This course is 100% continuous assessment with no terminal examinations.

Entry Requirements

Eligible applicants will have at least three years' teaching experience. Applicants must also have completed a recognised postgraduate diploma programme of continuing professional development for teachers involved in learning support and/or special education or the DCU accredited Professional Diploma in Special and Inclusive Education.

Selection criteria may apply to all candidates. A qualification of Masters in Special Educational Needs will be awarded to successful course participants by Dublin City University.

Graduate Certificate in the Education of Pupils on the Autism Spectrum

Postgraduate

The aim of this programme is to develop the knowledge skills and expertise of teachers, thus enhancing the provision of appropriate education for children and young people on the autism spectrum.

The programme provides substantial theoretical and practical continuing professional development for teachers working with students on the autism spectrum, to assess individual pupils' strengths and needs and to plan appropriate educational programmes.

How is the course taught?

This is a one-year, part-time programme consisting of five modules delivered through a blended model of "On-Site" learning at St Patrick's Campus and Distance Learning. The programme is based on the participants being released from their schools to attend the course venue for up to three weeks over the academic year.

The Distance Learning elements of the course include online lectures, discussions and activities. Content of the course will focus specifically on theory and practice relating to autism.

Framework of Course

- Understanding Autism
- Assessment, Profiling and Planning
- Planning Teaching and Learning for All (1 and 2)
- Wellbeing across the continuum

Course Assessment

The assessment of this course occurs through:

- Essay
- Diagnostic Assessment and Individual Education Plan
- Teaching: Planning and Practice

This course is 100% continuous assessment with no terminal examinations.

Entry Requirements

This programme is for registered teachers who hold a post currently funded by the Department of Education and Skills and who are currently working with students on the Autism Spectrum or who will be working with students on the Autism Spectrum for the duration of the Programme in recognised Primary Schools including Special Schools and recognised Post-Primary Schools. The programme is designed specifically to assist teachers in meeting the learning and teaching needs of students on the spectrum. Potential applicants must therefore have a teaching role in relation to students on the Autism Spectrum.

For most up to date information:
dcu.ie/courses

Career Prospects

Teachers who successfully complete the Graduate Certificate in the Education of Pupils on the Autism Spectrum are eligible to apply for the Master of Education in Autism (M.Ed in Autism) at the DCU Institute of Education. Further information is available on the DCU website: dcu.ie/ioe

Professional Certificate/Diploma in Special and Inclusive Education

Postgraduate

The overall aim of this programme is to develop the knowledge, skills and expertise of primary and post-primary mainstream class teachers in response to the demands of inclusive educational policy and practice. In particular, the course aims to provide an opportunity for teachers to develop knowledge and understanding, skills and expertise in key areas of inclusive and special educational provision and planning at school and class level.

This programme places particular emphasis on collaboration between participants in a learning community.

Understanding the Course

This programme has been jointly developed by DCU and the Institute of Child Education and Psychology, Europe (ICEP Europe) in recognition of the need to support teachers in meeting the increasing diversity of pupils' needs in mainstream classes.

The Programme

The Professional Certificate/Diploma in Special and Inclusive Education offers an exciting opportunity for teachers to extend their knowledge and skills and to explore new areas of learning in response to demands of inclusive educational policy and practice.

This programme enables teachers to participate in continuing professional development, in a structured, intensive and sustained way at convenient times, in an easily accessible manner regardless of location. It also supports the application of knowledge and skills learned at practice level.

How is the course taught?

This modular programme is taught through a combination of background reading, online learning and interactive activities, including live lectures. The online flexibility of this programme is enhanced as participants respond to learning activities by reflecting on their own experiences and practice. There is a one day on campus course induction. This course is 100% continuous assessment with no terminal examinations.

A tutor is responsible for each module and in order to offer personalised tuition and support student numbers in each group are small.

This programme is modular. The first module, which must be completed, is SI605/S1605a: Inclusion for Pupils with Special Educational Needs. Students then have the opportunity to select

modules of their choice. Four modules must be completed for the award of Certificate. An additional year-long research dissertation module must be completed for the award of Diploma.

Entry Requirements

Application is open to qualified teachers, at primary and post-primary Level 8 Pass Degree/Third Class Degree who hold a recognised qualification from an awarding institution in Ireland or elsewhere. Consideration will also be given to:

- Graduates who hold a recognised qualification, Level 8 Pass Degree / Third Class Degree from an awarding institution in Ireland (with experience of working in an educational, training or education-related professional context) or
- Those holding equivalent qualifications from elsewhere with significant experience of working in an educational, training or education-related professional context.

Career Prospects

Graduates of the Professional Diploma in Special and Inclusive Education are eligible to apply for the Masters in Special Educational Needs (MSEN).

The selection criteria are based on Diploma results and on the application form. Successful candidates will complete a further 90 credits over two academic years, 30 credits in year one and 60 credits in year two. For more information see: dcu.ie/DC994

Professional Certificate/Diploma in Education (Ethical and Multi-Denominational Education) - Level 9 Postgraduate

The Professional Certificate/Diploma in Education is a postgraduate qualification which builds on the general knowledge of a bachelor's degree to prepare students to teach in schools across the country. Specifically, the Ethical and Multi-Denominational programme is focused on preparing teachers to teach in multi-denominational and equality based schools, as well as preparing teachers to address issues of pluralism in faith based school settings.

Framework of course

The main focus of this programme is to provide opportunities for students to deepen their awareness of a range of practical and theoretical issues essential to learning and teaching within the education sector, and most especially in the multi-denominational or equality based sector. This Programme is open to practising teachers or other educators with an interest in developing professional knowledge in a selected aspect of curricular, cross curricular or school management and leadership issues. It focuses on both primary and postprimary contexts of education, in Ireland and internationally.

How is the course taught

The Professional Certificate/Diploma in Higher Education is comprised of four modules that include both taught and school based dimensions. Each module is equivalent to 5 ECTS credits.

Almost all modules are offered as blended learning, combining face to face tuition with online formats. After successful completion of four modules, students may choose to graduate with the Professional Certificate in Education (20 credit, Level 9 qualification). Alternatively, students who successfully complete a fifth dissertation module are awarded the Professional Diploma in Education (30 credit, Level 9 qualification).

Entry Requirements

For admission to the Professional Certificate/Diploma in Education programme, successful applicants will have:

- An honours undergraduate degree of an Irish level 8, or UK Honours undergraduate degree (H2.2 or above)
- Applicant with five years of relevant professional experience may also be considered

Master of Education (MEd) Special Options: Teaching and Learning

Postgraduate

The online Master of Education programme combines educational theory and applied studies and assists learners in the development of up-to-date knowledge in a chosen area of specialisation and beyond. The programme incorporates current educational thinking and the most effective pedagogical practices within a wide range of contemporary educational issues.

This online programme offers students an opportunity to develop expertise in a chosen field e.g. Teaching and Learning to critically reflect on your own practice and thinking, while also engaging with educational research and theory. It provides a grounding in research methodology and contemporary educational issues.

The on-going commitment is to provide our students with the highest academic standards in teaching, while supporting and fostering differing learning styles and needs.

Understanding the Course

The Master of Education is designed for educators who wish to pursue in-depth study in education for both professional and personal development. This programme offers the opportunity to educators to expand their knowledge within a special option. It aims to develop a deeper understanding of professional practice and the field of education as an academic discipline.

The MEd is a two year part-time programme. In the first year students undertake three core modules and three modules in their chosen special option, In the second year of the programme students undertake a thesis with the support of a supervising tutor

Course Structure

Year 1 (60 Credits)	Normal Timeframe	Credits
Qualitative Research Methods in Education	Sept-Jan	20
Sociology of Teaching and Learning		
Current Issues in Education	Jan-May	40
Quantitative Research Methods in Education special option modules		
Teacher Identity and Popular Culture		
Psychology applied to Teaching and Learning		
Year 2 (30 Credits)	Normal Timeframe	Credits
Dissertation	Sept-June	30

You are required to undertake 6 taught modules in year one of the programme. Students take three core modules two in research methods, one in Current Issues in Education and three modules within their chosen special option.

Modules are taught online on Tuesdays and Thursdays (6-9). Core modules are taught on Tuesdays and Special Option Modules are taught on Thursdays. You are also required to complete a research proposal during the summer period between Year 1 and Year 2.

To complete a Masters Degree, 7 modules are required, a Postgraduate Diploma requires 6 modules.

Career Prospects

The Master of Education programme is designed to meet the professional and personal needs of teachers and educators.

The course is intended for those who wish to make a significant contribution to the enhancement of professional practice in their chosen special option by reviewing and systematically applying appropriate theories and research to their professional practice.

Master of Education in Autism (MEdA)

NFQ Level 9

Postgraduate

The Masters of Education in Autism is a unique, part-time, blended, two year programme focusing on the needs of educators working with children and young people with autism. Open to educators working in primary and post-primary schools, in special schools, classes or in other recognised educational centres, this part-time course is delivered in a blended format to make it accessible and sustainable for practicing teachers working in schools.

The Programme

The focus of this programme is on developing graduates who are teacher researchers with a deep understanding of the educational needs of pupils with autism. The role of evidence-informed practice in the classroom, innovative approaches to collaboration, and whole school approaches to supporting inclusion will be emphasised. Learners will also master a range of relevant research methods and complete a level 9 dissertation.

How is the course taught?

Successful applicants entering the MEdA in year one will complete 90 credits over two academic years, 30 credits in Year One and 60 credits in Year Two. The programme is blended, with some content being delivered on-campus in Drumcondra, while the remainder will be delivered online for access at home.

Entry Requirements

Participants will be eligible to apply who hold a minimum Level 8 qualification in education, at minimum H2.2. and be registered with the Teaching Council of Ireland (or its equivalent in other jurisdictions). Additionally, participants must also be working with pupils on the autism spectrum for the duration of their enrolment on the MEdA.

MSc In Public Relations and Strategic Communications

Postgraduate

This programme will equip students with the advanced knowledge and skills to seek employment in public relations agencies and to work as independent public relations consultants. The programme is structured to meet the differing requirements of those wishing to enter the public relations profession and those already working in public relations roles, but who want to enhance their practice with engagement with the latest thinking and research.

Understanding the Course

Aims and Objectives of the Programme:

- To appreciate the strategic importance of public relations in the corporate, political and non-profit sectors
- To develop an understanding and critical reflection about the role and processes of public relations in organisations and society
- To engage with topics and issues about public relations, and demonstrate leadership and thoughtful reflection in discussions and group work
- To develop practical skills for PR planning and implementation alongside reflective skills and scholarship and understanding of the role and agendas which develop from PR as a strategic discipline

Course Structure

The MSc in Public Relations and Strategic Communications is a blended learning programme in that three of the six taught modules are delivered online, through the DCU Connected programme. All modules will be examined on a continuous assessment basis, including group and solo assignments. Assessment is continuous through the first two semesters and culminates in the completion of an academic dissertation or a followed by a dissertation or project and a formal work placement in industry.

The course is half on campus, and half online, with face to face classes on Monday afternoons evenings, and online seminars on Wednesday and Thursday evenings.

There are no terminal exams under this course. Participants are constantly engaged in analysis of situations, both independently and working in groups.

In the process, they are encouraged to question assumptions and to provide alternative perspectives that practical project. Reflective practice is encouraged throughout the programme in order to ensure the application of broaden and deepen their understanding of the issues under review. To facilitate students who may wish to leave the programme at an earlier stage, the option of exiting with a Graduate Certificate (30 credits) and Graduate Diploma (60 credits) is available. In this one year full-time blended Masters programme, participants learn through engagement in face-to-face sessions and lectures as well as through engagement in DCU's virtual learning environment. Case studies, online engagement, projects and assignments are combined with expert presentations and discussion to explore public relations in the 21st century.

Entry Requirements

Applicants will normally have a strong honours primary degree or equivalent (H1 or H2.1) but applicants with a H2.2 in a related discipline and/or with relevant work experience may also be considered. Appropriate combinations of professional qualifications and experience may be accepted as equivalent to an honours degree, in accordance with the relevant regulations of the University.

MSc in Diagnostics and Precision Medicine

Postgraduate

The MSc in Diagnostics and Precision Medicine is a new blended-learning programme that details how diagnostics and therapeutics are revolutionising healthcare and medicine by providing the right person with the right therapy at the right time.

The programme is aimed at:

- Life scientists (including newly qualified graduates)
- Professionals from the diagnostics, biopharmaceutical, pharmaceutical and healthcare industries
- Medical Practitioners (including General Practitioners and clinicians-in-training)

PAC Code
DC739
for Full-time
DC 740
for Part-time

Entry Method
PAC

Duration
1 year (Full-time)
Minimum 2 years
Maximum 4 years
(Part-time)

NFQ
Level 9

Delivery Mode
Blended

Framework of course

The programme has been designed with flexibility in mind by enabling students to:

- Access course material at a time and a place that is convenient to them
- Register Full-time or Part-time (Part-time students must complete all modules within a maximum period of four years)
- Tailor their education and training by offering exit routes at MSc (90 ECTS credits), Diploma (60 ECTS credits) and Certificate (30 ECTS credits)

How is the course taught

The programme is delivered through blended learning which is comprised of:

- Online (recorded) lectures
- Face-to-face tutorials at DCU (tutorials will also be recorded for those who would like to attend remotely)
- A 12-week research project (May - July)

In addition, several modules on the programme will be delivered by our partners at **Arizona State University** as part of the International School of Biomedical Diagnostics. Assessment is through continuous assessment and primarily consists of submission of online assignments throughout the year. Formal written examinations are not used for assessment of student learning.

Entry Requirements

Entry to the MSc in Diagnostics and Precision Medicine programme will be considered for candidates who hold a primary degree, with a Second-Class Honours (H2.1), or equivalent in life science, pharmaceutical or chemistry disciplines.

In addition, candidates who hold a primary degree, with a Second-Class grade (H2.2) in a relevant discipline and with industrial experience will be considered.

Medical graduates must have a MB, BCh, BAO or equivalent from a recognised medical school.

For more information see: dcu.ie/DC739

Career Prospects

Graduates will find employment in industry, clinical, healthcare and academic environments. This includes the diagnostics and biopharmaceutical industries, life science and clinical trials companies, as well as academic research centres.

Further Information

Further Information on Undergraduate Programmes

Entry Requirements

Applicants over 23 years on January 1st in the year of entry are eligible for admission to the undergraduate programmes and are automatically granted a place subject to submission of an application form and payment of a deposit. (BSc students should be aware that a competence in Mathematics, equivalent to approximately Leaving Certificate pass level, is required in order to successfully complete certain modules).

All applicants to the undergraduate programmes under 23 years on January 1st in the year of entry must satisfy the normal minimum general degree entry requirements of Dublin City University which are outlined at the following link: dcu.ie/registry/entry.shtml

English Language Requirements for non-Native Speakers of English

In the case of applicants who are non-native English speakers, evidence MUST be provided of competence in the English language. More details can be found at the following link: dcu.ie/registry/english.shtml

Attendance

Modules are taught using a blend of on-campus, face to face tutorials and online, virtual tutorials. On-campus, formal examinations are held in May (re-sits August) for modules with examinations. The final module in each subject has some mandatory on-campus attendance requirements.

Assessment

Most modules are a combination of continuous assessment (essays, presentations, online discussions, etc.) and end of year formal examinations. However, some modules are continuous assessment only.

Further Information on Postgraduate Programmes

Entry Requirements

- A Level 8 degree or higher on the NFQ in a relevant discipline (Engineering, Science, Business or ICT) from a recognised higher education institution
- Chartered membership of a professional body such as Chartered Accountants Ireland or Engineers Ireland
- A Level 7 qualification on the NFQ in a subject in a relevant discipline or non-chartered membership of a professional body, along with at least three years relevant Managerial experience
- A Level 8 qualification on the NFQ in a non-relevant discipline, along with at least three years relevant Managerial experience
- Evidence of substantial relevant work experience. Such applicants will be required to submit a CV in support of their application and will be required to attend an interview

Exemptions for Prior Accredited Learning Undergraduate

DCU Connected BA Programmes

The BA programmes allow for Recognition of Prior Learning (RPL). There are two types of exemptions offered: Specific and Non-Specific.

DCU Connected BSc Programmes

For the BSc programmes, Recognition of Prior Learning takes two forms:

1. Exemptions

If you have a Certificate, Diploma or Ordinary Degree (Level 6 or 7 on the National Framework of Qualifications nfq.ie) in an area related to the course, it may be possible for you to receive an exemption from studying some Level 1 and Level 2 modules of the course.

2. Direct Entry

Candidates for direct entry to the degree level modules must have an academic qualification in a cognate area. The Direct Entry Application form is the same as the BSc Exemption form which is available from the Programme Forms section of our website at: dcu.ie/connected/current-students.shtml

Those interested in applying for exemptions from Open Education programmes should firstly apply for their programme of choice and then see Exemption Forms online at: dcu.ie/connected/current-students.shtml

The Teaching Council of Ireland

Many people enter their studies with the ambition of becoming a post-primary teacher. The Teaching Council of Ireland was established to encourage teaching as a profession at primary and post-primary levels and to promote the professional development of teachers and to regulate standards in the profession.

Subjects that meet the Teaching Council Requirements

Bachelor of Arts: English, History, CSPE, Environmental and Social Studies (ESS) and Politics and Society.

Bachelor of Science in Information Technology: Computer Studies Coding (Junior Cycle Short Course), Digital Media Literacy (Junior Cycle Short Course).

Notes

As a professional athlete and living in rural Ireland, there is a deficit of postgraduate University programmes to access further education without invoking opportunity costs. However, DCU Connected unlocks a fantastic option to postgraduate education.

Initially I was apprehensive that the online method of learning would not be effective as traditional delivery methods, nor would it be possible to cater for various learning styles. However, these concerns were quickly satisfied once the course began. The delivery of the programme caters for greater efficiency in learning. Lectures can be accessed live or on demand, to suit various lifestyles and commitments.

This programme has afforded me the opportunity to represent Ireland in elite sport, to train and compete in various parts of the globe while at all times progressing my studies. This would not have been possible without distance/online learning with DCU. For that, I am incredibly grateful to DCU Connected.
