Research Centre: National Institute for Cellular Biotechnology

Post Title: Postdoctoral Researcher

Level on Framework: Level 1.

Post Duration: Fixed-Term Contract up to 36 Months

Overview

Dublin City University www.DCU.ie is a young, ambitious and vibrant University, with a mission ‘to transform lives and societies through education, research, innovation and engagement’. Known as Ireland’s ‘University of Enterprise and Transformation’, it is committed to the development of talent, and the discovery and translation of knowledge that advances society and the economy. DCU is the Sunday Times Irish University of the Year 2021.

The University is based on three academic campuses in the Glasnevin-Drumcondra region of north Dublin. It currently has more than 18,000 students enrolled across five faculties – Science and Health, DCU Business School, Computing and Engineering, Humanities and Social Sciences and DCU Institute of Education. DCU is committed to excellence across all its activities. This is demonstrated by its world-class research initiatives, its cutting-edge approach to teaching and learning, its focus on creating a transformative student experience, and its positive social and economic impact. This exceptional commitment on the part of its staff and students has led to DCU’s ranking among the top 2% of universities globally. It also consistently features in the world’s Top 100 Young Universities (currently in QS Top 70 Under 50, Times Higher Top 150 Under 100).

DCU is placed 84th in the world, in the Times Higher Education University Impact Rankings – measuring higher education institutions’ contributions towards the UN Sustainable Development Goals. Over the past decade, DCU has also been the leading Irish university in the area of technology transfer, as reflected by licensing of intellectual property.

As part of this role the researcher will be required to participate in the DCU Research Career Framework. This framework is designed to provide significant professional development opportunities to Researchers and offer the best opportunities in terms of a wider career path. The role may include teaching duties to assist with module delivery.
National Institute for Cellular Biotechnology
The National Institute for Cellular Biotechnology (www.nicb.ie) is a multidisciplinary centre for research on human cell biology and medicinal chemistry, with emphasis on research with application to cancer, diabetes, obesity, ocular diseases and the biopharmaceutical industry. It features advanced core facilities in proteomics, microscopy and mammalian cell culture, housing a large collection of human cell lines. The NICB prioritises translational research involving collaborations with industry and with clinicians.

Role Profile
We are seeking an experienced postdoctoral scientist to join a growing research group. The role will involve the proteomic and mass spectrometry analysis of Chinese hamster ovary (CHO) cells, the principal host cell line used in biopharmaceutical production of biotherapeutics, to identify protein targets that can be genetically manipulated in CHO cells to improve the efficiency of biopharmaceutical production. Experience in mammalian cell culture, protein analytical and molecular biology techniques is required for the role.

Duties and Responsibilities
Please refer to the job description for a full list of duties and responsibilities associated with this role.

Qualifications and Experience
Minimum criteria
The successful individual will have a PhD in biochemistry/bioanalytical sciences or equivalent.

In addition to the above it is desirable that the candidate possess a subset of the following skills and experience.

- Two years of postdoctoral research experience is required.
- Experience in mammalian cell culture, proteomics and protein analytical techniques
- Experience in mass spectrometry for protein/peptide analysis, and molecular biology.

Mandatory Training
The post holder will be required to undertake the following mandatory compliance training: Orientation, Health and Safety and Intellectual Property and Data Protection training. Other training may need to be undertaken when required.

Candidates will be assessed on the following competencies:

Discipline knowledge and Research skills – Demonstrates knowledge of a research discipline and the ability to conduct a specific programme of research within that discipline.

Understanding the Research Environment – Demonstrates an awareness of the research environment (for example funding bodies) and the ability to contribute to grant applications.
Communicating Research – Demonstrates the ability to convey their research with their peers and the wider research community (for example presenting at conferences and publishing research in relevant journals) and the potential to teach and tutor students.

Managing & Leadership skills - Demonstrates the potential to manage a research project including the supervision of undergraduate students.

Salary Scale: Post-Doctoral Researcher IUA Scale* €38,632 – €50,029 per annum. 

Appointments will be commensurate with qualifications and experience and will be made on the appropriate point of the salary scales, in line with current Government pay policy.

Closing Date: Tuesday 24th of August 2021

Informal Enquiries in relation to this role should be directed to:

Dr. Paula Meleady, Associate Centre Director, National Institute for Cellular Biotechnology, Dublin City University
E-mail: paula.meleady@dcu.ie
Phone: +353 (0)1 700 5910
Please do not send applications to this email address, instead apply as described below

Application Procedure:
Application forms are available from the DCU Current Vacancies website at http://www.dcu.ie/vacancies/current.shtml

Applications should be submitted by e-mail with your completed application form to hr.applications@dcu.ie

Please clearly state the role that you are applying for in your application and email subject line: Job Ref #RF1546 Postdoctoral Researcher

Dublin City University is an equal opportunities employer. In line with the Employment Equality Acts 1998 – 2015, the University is committed to equality of treatment for all those who engage with its recruitment, selection and appointment processes. The University’s Athena SWAN Bronze Award signifies the University’s commitment to promoting gender equality and addressing any gender pay gaps. Information on a range of university policies aimed at creating a supportive and flexible work environment are available in the DCU Policy Starter Packs.
