Research Centre  
School of Biotechnology / Water Institute

Post title  
Postdoctoral Researcher

Environmental DNA – TechOcean S Project

Level on Framework  
Level 1

Post duration  
Fixed term contract up to 13 months

Dublin City University

Dublin City University www.DCU.ie is a young, ambitious and vibrant University, with a mission ‘to transform lives and societies through education, research, innovation and engagement’. Known as Ireland’s ‘University of Enterprise and Transformation’, it is committed to the development of talent, and the discovery and translation of knowledge that advances society and the economy. DCU is the Sunday Times Irish University of the Year 2021.

The University is based on three academic campuses in the Glasnevin-Drumcondra region of north Dublin. It currently has more than 18,000 students enrolled across five faculties – Science and Health, DCU Business School, Computing and Engineering, Humanities and Social Sciences and DCU Institute of Education. DCU is committed to excellence across all its activities. This is demonstrated by its world-class research initiatives, its cutting-edge approach to teaching and learning, its focus on creating a transformative student experience, and its positive social and economic impact. This exceptional commitment on the part of its staff and students has led to DCU’s ranking among the top 2% of universities globally. It also consistently features in the world’s Top 100 Young Universities (currently in QS Top 70 Under 50, Times Higher Top 150 Under 100).

DCU is placed 84th in the world, in the Times Higher Education University Impact Rankings – measuring higher education institutions’ contributions towards the UN Sustainable Development Goals. Over the past decade, DCU has also been the leading Irish university in the area of technology transfer, as reflected by licensing of intellectual property.

As part of this role the researcher will be required to participate in the DCU Research Career Framework. This framework is designed to provide significant professional development opportunities to Researchers and offer the best opportunities in terms of a wider career path.

Research Career Framework

As part of this role the researcher will be required to participate in the DCU Research Career Framework (http://dcu.ie/hr/ResearchersFramework/index.shtml). This framework is designed to provide significant professional development opportunities to researchers and offer the best opportunities in terms of a wider career path.
Background & Role

Project background: The Technologies for Ocean Sensing project is an EU Horizon 2020 funded project to develop new technologies to enable a step change in ocean biology, chemistry and plastic observation. The project is led by the National Oceanography Centre (UK) with partners across Europe, including Dublin City University. The technologies include 5 sensors, two imaging systems, a sampler and a new image processing method using Artificial Intelligence that enables data compression and transmission of information about key variables from the remote ocean. The environmental DNA project will focus on an in situ analyser for Nucleic Acids (DNA and RNA) including using eDNA for species detection.

Role Profile:
The successful candidate will join the Molecular Genetics Laboratory in the School of Biotechnology at DCU and will further develop molecular detection and extraction assays, including applying CRISPR-Cas to marine environmental DNA, for sensor adaptation (https://onlinelibrary.wiley.com/doi/abs/10.1111/1755-0998.13045).

Principal Duties and Responsibilities
Please refer to the job description for a full list of duties and responsibilities associated with this role.

Minimum Criteria
The successful candidate must hold a Ph.D in a biology-related discipline and have experience in molecular biology techniques, particularly, experience working with environmental DNA.

Candidates will be assessed on the following competencies:

Discipline knowledge and Research skills – Demonstrates knowledge of a research discipline and the ability to conduct a specific programme of research within that discipline.

Understanding the Research Environment – Demonstrates an awareness of the research environment (for example funding bodies) and the ability to contribute to grant applications.

Communicating Research – Demonstrates the ability to communicate their research with their peers and the wider research community (for example presenting at conferences and publishing research in relevant journals) and the potential to teach and tutor students.

Managing & Leadership skills - Demonstrates the potential to manage a research project including the supervision of undergraduate students.

Essential Training
The post holder will be required to undertake the following essential compliance training: Orientation, Health and Safety and Intellectual Property and Data Protection training. Other training may need to be undertaken when required.

*Appointments will be commensurate with qualifications and experience and will be made on the appropriate point of the salary scales, in line with current Government pay policy.

**Closing date:** 10th September 2021

For more information on DCU and benefits please visit: [Why work at DCU?](#)

**Additional Information**

The successful individual be offered opportunities for developing their own careers in a number of directions including support for conference/workshop travel, upskilling through Insight’s continuous professional development in areas like research ethics and data privacy, student supervision and development and submission of their own research project proposals.

**Informal Enquiries should be directed to:**
Dr Anne Parle-McDermott, Professor in Genetics at the School of Biotechnology in Dublin City University.

Email: anne.parle-mcdermott@dcu.ie
Phone: 017008499

Please do not send applications to this email address, instead apply as described below.

**Application Procedure:**

Application forms are available from the DCU Current Vacancies website at https://www.dcu.ie/hr/vacancies-current-vacancies-external-applicants (external applicants)

Applications should be submitted by e-mail with your completed application form to hr.applications@dcu.ie

Please clearly state the role that you are applying for in your application and email subject line: Job Ref #RF1561 Postdoctoral Researcher Environmental DNA – TechOcean S Projects

---

Dublin City University is an equal opportunities employer.

In line with the Employment Equality Acts 1998 – 2015, the University is committed to equality of treatment for all those who engage with its recruitment, selection and appointment processes.

The University’s Athena SWAN Bronze Award signifies the University’s commitment to promoting gender equality and addressing any gender pay gaps. Information on a range of university policies aimed at creating a supportive and flexible work environment are available in the [DCU Policy Starter Packs](#).
