**Dublin City University**

Dublin City University ([www.DCU.ie](http://www.DCU.ie)) is a young, ambitious and vibrant University, with a mission ‘to transform lives and societies through education, research, innovation and engagement’. Known as Ireland’s ‘University of Enterprise and Transformation’, it is committed to the development of talent, and the discovery and translation of knowledge that advances society and the economy. DCU is the Sunday Times Irish University of the Year 2021.

The University is based on three academic campuses in the Glasnevin-Drumcondra region of north Dublin. It currently has more than 18,000 students enrolled across five faculties – Science and Health, DCU Business School, Computing and Engineering, Humanities and Social Sciences and DCU Institute of Education. DCU is committed to excellence across all its activities. This is demonstrated by its world-class research initiatives, its cutting-edge approach to teaching and learning, its focus on creating a transformative student experience, and its positive social and economic impact. This exceptional commitment on the part of its staff and students has led to DCU’s ranking among the top 2% of universities globally. It also consistently features in the world’s Top 100 Young Universities (currently in QS Top 70 Under 50, Times Higher Top 150 Under 100).

DCU is placed 84th in the world, in the Times Higher Education University Impact Rankings – measuring higher education institutions’ contributions towards the UN Sustainable Development Goals. Over the past decade, DCU has also been the leading Irish university in the area of technology transfer, as reflected by licensing of intellectual property.

As part of this role the researcher will be required to participate in the DCU Research Career Framework. This framework is designed to provide significant professional development opportunities to Researchers and offer the best opportunities in terms of a wider career path.
Background & Role

A dynamic and rapidly growing School within the Faculty of Science and Health, the School of Health and Human Performance at DCU is developing an international reputation in health, sport and exercise science, and physical education. As such, the School of Health and Human Performance is committed to researching, understanding and disseminating knowledge about exercise and physical activity across the continuum from health to elite sport performance, and to the area of musculoskeletal medicine. The mission of the School is to foster optimum wellness in all phases of the human life cycle through the provision of academic programmes, research and the translation of research into public health or high performance strategies with practical implementation.

Faculty and postgraduate research students in the School of Health and Human Performance investigate a wide range of topics concerning human movement and education, athletic performance, musculoskeletal medicine and health promotion. The School has a thriving research environment and the candidate must have the ability and desire to achieve excellence in their chosen area. The successful individual will be based in the School of Health & Human Performance, DCU. Fieldwork will be undertaken at participating site.

The Project

The School of Health & Human Performance wishes to recruit a Postdoctoral Researcher on a fixed-term contract basis to aid in the development, design, implementation, and evaluation of a bespoke, evidence-based mental health education programme to improve Irish farmers’ knowledge of mental health issues and help-seeking. This three-study research project aims to improve the Irish farming community’s mental health literacy and intentions to seek help when experiencing mental health issues. This role requires the candidate to have a strong background in intervention-based research, mental health, psychology, and experience in industry partnerships.

Principal Duties and Responsibilities

Reporting to their Principal Investigator the duties and responsibilities of the Postdoctoral Researcher will include:

- Conduct a specified programme of research under the supervision and direction of the Principal Investigator
- Assist the PI and research group in the design, development, implementation, and evaluation of the research programme
- Assist the PI in the management / co-ordination of key aspects of the research programme (e.g. financial management, reporting, equipment management etc.)
- Engage in the dissemination of the results of the research in which they are engaged to the wider research community with the support and under the supervision of the Principal Investigator
- Active engagement in appropriate training and development opportunities as required by the Principal Investigator, the School or Research Centre, or the University
- Engage with internal and external stakeholders including academic and industry partners/collaborators as appropriate
• Disseminate through peer reviewed publication and conference presentation the research outputs of the research group
• Carry out administrative work associated with the programme as necessary

Minimum Criteria

Applicants for this position must have a PhD in a relevant discipline (e.g., Psychology, Health Psychology, Mental Health).

In addition, it is desirable that applicants have:

• Experience in one or more of the following areas: health interventions, mental health and/or psychology;
• Previous experience in mixed methods or qualitative research;
• An emerging record of peer-reviewed publications;
• Be able to take initiative and work under pressure to tight deadlines
• Excellent written and oral proficiency in English (essential), good communication and interpersonal skills both written and verbal
• Proven ability to prioritise workload and work to exacting deadlines
• The ability to be flexible and adaptable in responding to stakeholder needs
• The self-assurance to take responsibility and be a strong team player who can contribute to the overall success of the team
• Enthusiastic and structured approach to research and development
• Excellent problem solving abilities

Candidates will be assessed on the following competencies:

**Discipline knowledge and Research skills** – Demonstrates knowledge of a research discipline and the ability to design and implement part of a programme of research (for example by using critical thinking and the application of relevant research methodologies)

**Understanding the Research Environment** – Demonstrates an awareness of the research environment and the ability to contribute substantially to grant applications

**Communicating Research** – Demonstrates the ability to communicate their research with their peers and the wider research community (for example presenting at conferences and publishing research in relevant journals) and the potential to teach and tutor students

**Managing & Leadership skills** - Demonstrates the potential to manage a research project including the supervision of undergraduate/postgraduate students and/or junior research staff
