Applications are invited from suitably qualified staff for the following position:

**Research Centre**  
**Post title**  
Research Fellow  
Bioinorganic and Medicinal Chemistry  
**Level on Framework**  
Level 2  
**Post duration**  
Fixed Term Contract 12 months

**Dublin City University**

Dublin City University www.DCU.ie is a young, ambitious and vibrant University, with a mission ‘to transform lives and societies through education, research, innovation and engagement’. Known as Ireland’s ‘University of Enterprise and Transformation’, it is committed to the development of talent, and the discovery and translation of knowledge that advances society and the economy. DCU is the Sunday Times Irish University of the Year 2021.

The University is based on three academic campuses in the Glasnevin-Drumcondra region of north Dublin. It currently has more than 18,000 students enrolled across five faculties – Science and Health, DCU Business School, Computing and Engineering, Humanities and Social Sciences and DCU Institute of Education. DCU is committed to excellence across all its activities. This is demonstrated by its world-class research initiatives, its cutting-edge approach to teaching and learning, its focus on creating a transformative student experience, and its positive social and economic impact. This exceptional commitment on the part of its staff and students has led to DCU’s ranking among the top 2% of universities globally. It also consistently features in the world’s Top 100 Young Universities (currently in QS Top 70 Under 50, Times Higher Top 150 Under 100).

DCU is placed 84th in the world, in the Times Higher Education University Impact Rankings – measuring higher education institutions’ contributions towards the UN Sustainable Development Goals. Over the past decade, DCU has also been the leading Irish university in the area of technology transfer, as reflected by licensing of intellectual property.

As part of this role the researcher will be required to participate in the DCU Research Career Framework. This framework is designed to provide significant professional development opportunities to Researchers and offer the best opportunities in terms of a wider career path.
Background & Role
The School of Chemical Sciences at Dublin City University invites applications for a senior postdoctoral research fellow in synthetic bioinorganic chemistry to work on a collaborative project on the development of new cancer theranostics using Auger electron and photon-emitting antimony and cobalt isotope pairs funded by the NovoNordisk Foundation. The position is available from January 2021, initially for one year, with the possibility of extension for two years (pending the award of external extension funding).

The goal of this specific project is to develop biocompatible chelating ligands that coordinate Sb and Co and to link these to nucleic acid vectors via click chemistry. The hybrids will then be used to target specific oncogenes in cancer cells. The project will involve collaboration with the University of Southern Denmark and the department of Nuclear Medicine at Odense University Hospital.

Principal Duties and Responsibilities
Please refer to the job description for a list of duties and responsibilities associated with this role.

Minimum Criteria
The applicant must hold a PhD in synthetic bio-inorganic chemistry, have a minimum of 4 years of postdoctoral research experience, and have a strong publication track record in the field of nucleic acid chemistry or in designing new metallodrug-DNA (or RNA) binding agents. A knowledge of nucleic acid click chemistry is necessary. An excellent track record in laboratory skills (including cell culture experience, biophysical assay design, and molecular biology) directly related to this project is essential. Excellent communication skills in English, both written and spoken, are a necessity. The candidate must be at the senior postdoctoral level and have experience in supervising postgraduate researchers, group administration, and European and national (e.g. SFI / IRC) grant writing.

Discipline knowledge and Research skills – Demonstrates knowledge of a research discipline and the ability to conduct a specific programme of research within that discipline.

Understanding the Research Environment – Demonstrates an awareness of the research environment (for example funding bodies) and the ability to contribute to grant applications.

Communicating Research – Demonstrates the ability to communicate their research with their peers and the wider research community (for example presenting at conferences and publishing research in relevant journals) and the potential to teach and tutor students.

Managing & Leadership skills - Demonstrates the potential to manage a research project including the supervision of undergraduate students.

Essential Training
The post holder will be required to undertake the following essential compliance training: Orientation, Health and Safety and Intellectual Property and Data Protection training. Other training may need to be undertaken when required.

Salary: Research Fellow, Point 1 (IUA Scale) - €56,369
*Appointment will be commensurate with qualifications and experience and will be made on the appropriate point of the IUA Researcher salary scale, in line with current Government pay policy.

**Closing date:** 22nd February 2022

Informal Enquiries in relation to this role should be directed to:
Assoc. Prof. Andrew Kellett, School of Chemical Sciences, DCU, Dublin 9
E-mail: [andrew.kellett@dcu.ie](mailto:andrew.kellett@dcu.ie)

Please do not send applications to this e-mail address, instead apply as described below.

**Application procedure:**
Application forms are available from the DCU Current Vacancies website at http://www.dcu.ie/vacancies/current.shtml

Applications and cover letters (describing your motivation for the position) should be submitted by e-mail with your completed application form to [hr.applications@dcu.ie](mailto:hr.applications@dcu.ie)

Please clearly state the role that you are applying for in your application and email subject line: Job Reference #RF1625 Research Fellow - Bioinorganic and Medicinal Chemistry.

*Dublin City University is an equal opportunities employer. In line with the Employment Equality Acts 1998 – 2015, the University is committed to equality of treatment for all those who engage with its recruitment, selection and appointment processes. The University’s Athena SWAN Bronze Award signifies the University’s commitment to promoting gender equality and addressing any gender pay gaps. Information on a range of university policies aimed at creating a supportive and flexible work environment are available in the DCU Policy Starter Packs*
