Welcome to DCU Apps Email

Now that you've switched from Mozilla Thunderbird® to DCU Apps, here are some tips on beginning to use DCU Apps Email as your new mail program.

For interface training lessons see the Synergyse training tab on your Chrome browser.

Access mail (typically) from one computer behind a Access mail securely via the Internet, from any firewall computer, anywhere View messages and their replies by default as Group messages and their replies by default in individual entries in your Inbox conversation threads Organize messages in folders Tag messages with *labels* Flag important messages Star important messages Flag messages for follow-up Add messages to your Tasks list Tag messages with color categories Color-code your labels Sort messages by sender or date or size "Sort" messages using DCU Apps email search Check spelling after composing Auto-spell check while composing Create multiple signatures Use the Canned Responses lab Archive messages to unclutter your Inbox Delete messages, typically to save space (no need to delete, thanks to 30GB storage) Get desktop mail notifications via Desktop Alerts Enable Desktop Notifications in Chrome or install the Google Talk desktop client

- Click the **Compose** button. A new message appears at the right corner of your Inbox.
- Shift-click Compose to author your message in a new browser window, without covering your Inbox.

Address the message

Type the first few letters of a recipient's name. Then select the address you want from the directory or list of recent correspondents that appears.

To copy someone, click **Cc** or **Bcc** that shows up when you're in the **To** field (labeled **Recipients** when you're not entering addresses). You can also drag addresses between **To**, **Cc**, and **Bcc**.

Check spelling after composing

Compose your message first. Click the **More Options** arrow on the lower-right of your message footer. Then select **Check Spelling** to highlight and correct possible misspellings.

In Mozilla Thunderbird® ... Format and add pictures

- Add rich formatting
- Insert images to a message

In DCU Apps Email ... Format and add pictures

Add formatting, colors, links, highlighting, and pictures using tools in the message footer.

Use canned responses

Create one signature for all your messages, or multiple signatures using canned responses.

To format the text of your message, click the <u>A</u> in the message footer to see formatting options.

To add a picture, hover over the **plus sign** to expand insert options. Then click the **camera** icon to insert an image in the message body. Or click the **paperclip** to attach it at the bottom.

Chrome browsers only: Attach pictures by dragging them into the message body. If you drag and drop a single picture, the image will insert in your message instead of attaching.

To create a signature, go to your DCU Apps Email **Settings** (in the gear menu).

Your signature is automatically inserted in each new message.

Settings

To use other signatures, enable the **Canned Responses lab**. Then create a canned response for each signature. When composing a message, choose the signature you want from **Canned responses** in the **More Options** menu in your message footer.

In Mozilla Thunderbird® ... Attach or drag a file

Browse for the file. Or drag or paste it into the message.

In DCU Apps Email ... Upload and attach a file

Click the **paperclip icon** and browse for the file.

To prevent the spread of viruses, DCU Apps Email doesn't let you attach executable (.exe) files.

Choose multiple files in the same folder by Control-clicking the files you want to attach.

Chrome browsers only: Drag an image or a PDF directly from your desktop into the message.

Remove attachments to save space

Remove an attachment without deleting the message.

Keep all your attachments

You don't have to delete email or attachments to save space (since you have so much of it).

You can remove an attachment by deleting the message containing it, but why bother? DCU Apps Email attachments reside in the cloud where you have 30 GB of personal storage space. An attachment is copied to your computer only if you download it.

- Click an attachment's **Download** link to download a copy of the attachment, in its original format, to your computer.
- Chrome browsers only: Drag an attachment directly from the message to your desktop to download it.
- Click View to preview the attachment in a browser window, without downloading it.

In Mozilla Thunderbird® ... Multiple Inbox entries per thread

In DCU Apps Email ... A single entry per thread

By default, DCU Apps Email groups a message and its replies in a conversation that's listed as a single Inbox entry.

Prefer the unthreaded view? To list all your messages separately as in Thunderbird, turn Conversation view off. Do this temporarily (it's easy to switch back) or for good.

Go to your **Mail Settings** > **General** tab, and select **Conversation view off**.

The Inbox entry identifies participants and shows how many messages are in the conversation.

This entry shows that Polly sent a message that was replied to by Nancy and Ryan. Ryan's name is in bold because his response is unread.

Print or expand the entire thread

When you open a conversation, its messages appear in a stack with the latest unread reply open for viewing.

These buttons perform tasks on all messages in the conversation.

- Expands or collapses all messages.
- Prints all messages.

Opens conversation in its own window.

Print or delete a single message

Click a message in the stack to expand it for viewing.

Use the pop-up menu *inside* the message to perform tasks on just that message. For example, click **Print** to print just that message. Click **Delete this message** to delete just that message from the thread.

In Mozilla Thunderbird® ... Reply to a message

you're replying only to the sender or recipients of that message, not to other participants in the conversation.

If a message includes a signature or previous replies, DCU Apps Email hides them from view. Click [••••] to view all the text to be included with your reply.

Who sees your reply?

Before sending a reply, you can verify the recipients by checking the email addresses in the **To** and **Cc** fields. If a participant's address isn't there, he or she won't see your response.

This example shows that only Nancy Newel and Polly Peterson will see this reply in their conversation stack.

Forward an entire conversation

You can't attach email messages to a message in DCU Apps Email (as you can in Outlook). But you can send someone all the messages in a conversation thread by forwarding the entire conversation.

Open the **More** menu above the conversation stack and click **Forward all**.

Recipients of a forwarded conversation receive a single message that contains all replies from the original conversation.

In Mozilla Thunderbird® ... Delete mail to save space

Limited disk space on your server often means you must delete email or store it offline, to unclutter your Inbox.

Archive	۵	Junk	0	Delete

In DCU Apps Email ... Archive it instead!

30 GB of personal storage space in the cloud means you have room to archive messages instead, keeping them in your mailbox for later reference.

Clean up your Inbox

Archive messages you're not using now to move them out of your Inbox—even conversations whose replies you want to keep tracking.

- Select one or more messages and click the **Archive** button.
- Ŧ
- Archiving a conversation doesn't remove you from the thread; any new reply automatically returns the conversation to your Inbox (unless you **Mute** the conversation.)

All your mail is just a click away

- You can see all your messages, including ones you've archived, in **All Mail** view. Or find specific messages quickly using DCU Apps Email search.
 - Click **All Mail** to view the contents of your archive along with the rest of your email. (To see this link, you might first have to click **More**.)

Keyword Searches

Start by searching for keywords that appear anywhere in the message, including the subject, body, and sender name. A few search terms are usually all you need.

Targeted searches

Use search options to narrow your search's focus.

Click the down arrow at the right of the search bar to open the search options box.

This example searches for messages with attachments sent by Ryan between February 20 and April 20 of the current year.

Search shortcuts

After your search, DCU Apps Email shows you a text version of the search. Next time, you can type these search operators directly (e. g., *from:ryan has:attachment*, etc.) without having to open the box.

- DCU Apps Email labels work a lot like categories in Outlook. As with categories, you can assign several color-coded labels to a message, then sort your email by label to find related messages.
 - To color-code a label, click to the right of the label (a box with an arrow appears) and choose a color scheme.
 - Click **Add a custom color** to create a color scheme of your own.

Go to your DCU Apps Email Settings to choose which symbols you want to use (on the General tab, scroll down to Stars).
