Overview
With 40 years of expertise, state-of-the-art laboratories, and a diverse team supervised by globally-recognized faculty members, the DCU School of Electronic Engineering is firmly embedded in the national and international research network. Much of our research involves collaboration with academic institutions, private companies and public bodies. Our structured PhD programmes enable postgraduate students to complement their research with critical skills like communication, commercialization and entrepreneurship. This document details a suggested structured doctoral pathway for graduate researchers in the School of Electronic Engineering. While the main focus for each research candidate is to complete a piece of original research presented in thesis format, students are also supported in developing a range of skills and competencies through taught modules and other learning opportunities.

Selection and Registration
During the registration, all research students may take a mix of credit-bearing modules (Graduate Training Elements or GTEs), and other non-accredited education opportunities such as workshops, seminars and short courses. These opportunities provide both discipline-specific and transferable skills and knowledge to support students in their research and enhance their research qualification. Engagement in these activities is an important aspect of the graduate research experience.

Typical modules taken by Electronic Engineering PhD students are shown in the listing overleaf. Students may also choose modules from the complete list of Electronic Engineering modules available to PhD students which can be viewed at: http://ece.eeng.dcu.ie/postgraduate/postgraduate-module-selection/

Students who complete a minimum of 20 GTE credits, in addition to the 270-ECTS thesis, will be recognized as having completed a structured PhD. At least one module should be from the list of discipline-specific modules and one from the list of transferable skills modules. The modules chosen on the structured pathway should be discussed and agreed in the first instance with the supervisor and progress reported on the annual PGR2 form. Students should register for their approved GTE modules during the online registration process.

Progression
The Structured Pathway work plan for each student should be discussed and agreed in the first instance with the Supervisor and progress (including confirmation of completion of the Online Research Integrity Training Module and other modules) recorded on the annual PGR2 form.

Induction and Training
Students are encouraged to take advantage of the additional training opportunities offered by the Graduate Studies Office (GSO) and by the School as appropriate. All students are required to attend the orientation and induction sessions organized by GSO during year one. GSO communicates details of their training schedule to each student at the beginning of each semester. First-year students are also required to take the Online Research Integrity Training module during year one of their studies.
Structured Doctoral Pathway 2022-23

Core Discipline Specific Modules

- EE513: Connected Embedded Systems - 7.5 ECTS (Sem 2)
- EE500: Network Performance - 7.5 ECTS (Sem 1)
- EE506: Photonic Devices - 7.5 ECTS (Sem 1)
- EE535: Energy System Decarbonisation - 7.5 ECTS (Sem 1)
- EE544: Computer Vision - 7.5 ECTS (Sem 2)
- EE613: Advanced Topics in Machine Learning - 7.5 ECTS (Sem 2)
- EE488: Mathematical Techniques and Problem Solving - 7.5 ECTS (Sem 1)
- EE519: Wireless Communications in Fading Channels – 7.5 ECTS (Sem 2)

Core Transferable Skills Modules

- EE507: Entrepreneurship for Engineers - 7.5 ECTS (Sem 2)
- GS602/A: Postgraduate Tutoring Principles & Practice - 5 ECTS (Sem 1 or 2)
- TP602: Research Ethics - 5 ECTS (Sem 2)
- EE611/A: Enterprise Experience for Graduate Research Students - 10 ECTS (Sem 1 & 2)
- LC600: English for Academic Purposes - 5 ECTS (Year Long)
- CA637: Advanced Scientific Communication Skills - 5 ECTS (Year Long)

Non-accredited Training, Workshops and Masterclasses

- Graduate Studies Office Orientation Programme
- Online Research Integrity Training Module (Engineering and Technology stream) (non-accredited)
- Students are also encouraged to engage with centrally- and locally-offered workshops and seminars that align with their development needs

Structured Doctoral Pathway 2022-2023
School of Electronic Engineering
